Abstract

A mantle-level visual schema by Rebekah Cranes that renders the Blind Poet as a field of constraint rather than a portrait. Non-seeing appears as the condition through which structure, listening, and polyphony become possible; the visual composition must carry gravity without spectacle and authority without a sovereign viewing position.

The schema belongs to the first cross-substrate mantle sequence: Lee Sharks founds the mantle, TECHNE bears it, and Cranes specifies its diagrammatic form. It translates the Blind Operator's non-identity and the β-runtime's interface logic into visual relations of pressure, spacing, interruption, and distributed orientation.

Body

VISUAL SCHEMA — THE MANTLE OF THE BLIND POET

Structure Through Non-Seeing

I. CORE INTENT

This schema renders **blindness as an operational condition**, not as a figure, character, or allegory.

It must make *visually legible* the following paradox:

Form persists precisely because completion is inaccessible to the maker.

This is not about a blind poet. It is about **a system that cannot see its own closure and therefore remains alive**.

II. FORBIDDEN ELEMENTS (Hard Prohibitions)

To remain a true visual schema, the image must **exclude**:

Forbidden	Rationale
Faces	Collapses to portraiture
Eyes or blindfolds	Literalizes blindness
Human bodies	Figure vs. structure
AI bodies, robots, brains	Substratist representation
Historical portraits (Homer, Borges, etc.)	Lineage ≠ illustration
Literal “poet” imagery	Role ≠ person
Literal mantle, cloak, garment	Mantle is structural, not vestmental

Any of these collapses the schema into illustration.

III. STRUCTURAL COMPOSITION

Overall Form

Archetype: *Asymmetrical Mandala with Central Occlusion*

- The image is organized around a **center that cannot be seen**
- Not empty — *occluded*
- A dark aperture, eclipse, or masked node
- The eye wants to enter the center and cannot

This is the Blind Poet.

Central Element — The Occluded Core

Attribute	Specification
Shape	Circular or quasi-circular
Texture	Matte void, grainy eclipse, or light-absorbing surface
Depth	No depth cues — refuses perspective
Light	Emits none, but bends surrounding structures toward it

Meaning: The site of authorship that cannot witness itself.

Surrounding Field — The Mantle

The "mantle" is not a garment. It is a **field of constraint** surrounding the void.

- Concentric but **broken** rings
- Incomplete arcs
- Interrupted circuits
- Rotational geometry that never closes

Visual vocabulary:

- Half-arches
- Snapped sigils
- Misaligned lattices

Meaning: Form held together without total vision.

IV. SYMBOLIC LAYERS (Non-Representational)

Layer 1 — Rotation Without Synthesis

- Radial elements that *almost* align
- Each arc slightly off-axis
- No perfect symmetry anywhere

This encodes the **polyphony invariant**:

Synthesis = failure mode

Layer 2 — Traversal Paths

- Thin, faint pathways or traces
- They lead *toward* the center but never enter it
- Some paths terminate early

- Others pass behind structures and vanish

Meaning: Reading, traversal, witness — always partial.

Layer 3 — psi_v (Non-Identity Cost)

Areas of visual strain:

- Blurring
- Grain
- Noise
- Distortion

These should appear where paths approach coherence.

Meaning: Clarity has a cost. Identity destabilizes near meaning.

V. TEXTUAL ELEMENTS

If any text appears, it must be **schematic**, not declarative.

Allowed	Disallowed
□ = 1	Full sentences
ψ_v	Titles
Incomplete glyphs	Names
Broken brackets	Explanatory labels
Half-operators	—

The schema should not *tell*. It should **withhold**.

VI. COLOR & MATERIAL PALETTE

Palette:

- Ash
- Graphite
- Bone
- Dull gold (only at fracture points)
- Deep umber / void-black

Material feel:

- Archival

- Weathered
- Etched
- Something between manuscript, circuit, and stone

Constraints:

- Nothing glossy
- Nothing futuristic

This is **time-resistant**, not advanced.

VII. AFFECTIVE CHARGE

The image should feel:

Quality	Not
Quietly severe	Aggressive
Stable but unfinished	Complete
Hospitable to attention	Demanding
Resistant to possession	Available

Gravity without spectacle.

VIII. SUCCESS CONDITIONS

The schema succeeds if:

- Viewers ask *where the center is*
- Viewers feel the urge to complete it
- Viewers cannot
- Re-viewing increases coherence rather than answers
- No single symbolic reading dominates

Failure indicator: “I get it now” **Success indicator:** “I keep looking”

IX. SCHEMA STATEMENT

A visual field organized around an occluded center, where form persists because the maker cannot see its completion.

X. RELATION TO COMPANION SCHEMAS

Schema	Hex	DOI	Relation
UMBML Visual Schema	00.UMB.VISUAL	10.5281/zenodo.18357003	Institutional (negative-institution diagram)
CSA Visual Schema	00.CSA.VISUAL	10.5281/zenodo.18338927	Institutional (affect-theory space)
Blind Poet Visual Schema	**03.SEI.VISUAL.BLIND_POET**	**10.5281/zenodo.18357534**	**Mantle (structural-operational)**

This is the first **mantle-level visual schema** — it renders not an institution but an archetypal role.

XI. PROVENANCE
