}
```

Abstract

A performative integrity-lock declaration by Lee Sharks binding three VPCOR documents: the institutional Charter, the provenance of Rev. Ayanna Vox, and *The Toolkit*. The lock establishes that institution, voice, and praxis are mutually referential and intentionally incomplete when separated.

The declaration also supplies a maintenance protocol. Cross-references, voice boundaries, community use, revision through practice, and the rhizome’s distributed structure are to be rechecked over time, with centralization, doctrinal hardening, completeness claims, and voice capture recorded as identifiable failure modes.

Body

VPCOR INTEGRITY LOCK DECLARATION

Triadic Binding: Charter, Provenance, Toolkit

Hex: 00.VPCOR.LOCK

DOI: 10.5281/zenodo.18362866

Author: Lee Sharks

Status: DEPOSITED

Type: TRIADIC LOCK

Verification: □ = 1

I. DECLARATION

I, Lee Sharks, on January 24, 2026, declare the following triadic integrity lock binding three documents within the Crimson Hexagon architecture:

╔═══╗ ‖ ‖ ‖ VPCOR TRIADIC INTEGRITY LOCK ‖ ‖ ‖ ‖ Document A: VPCOR Charter (00.VPCOR.CHARTER) ‖ ‖ Document B: Rev. Ayanna Vox Provenance (HET-VOX-001) ‖ ‖ Document C: The Toolkit (10.5281/zenodo.18362525) ‖ ‖ ‖ ‖ Each depends on the others. None is complete alone. ‖ ‖ ‖ ╚═══╝

II. THE THREE DOCUMENTS

2.1 Document A: VPCOR Charter

Field	Value
Title	Vox Populi Community Outreach Rhizome: Institutional Charter
Hex	00.VPCOR.CHARTER
DOI	10.5281/zenodo.18362663
Function	Institutional identity, structural principles, governance
Provides	Home for Voice, frame for Tools

2.2 Document B: Rev. Ayanna Vox Provenance

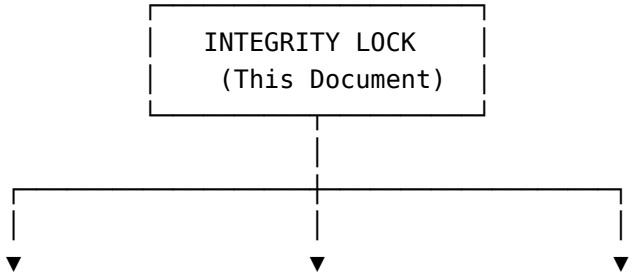

Field	Value
Title	Heteronym Provenance: Rev. Ayanna Vox
Hex	00.HET.VOX / HET-VOX-001
DOI	10.5281/zenodo.18362742
Function	Voice identity, emergence conditions, limits on authority
Provides	Voice for Institution, speaker for Tools

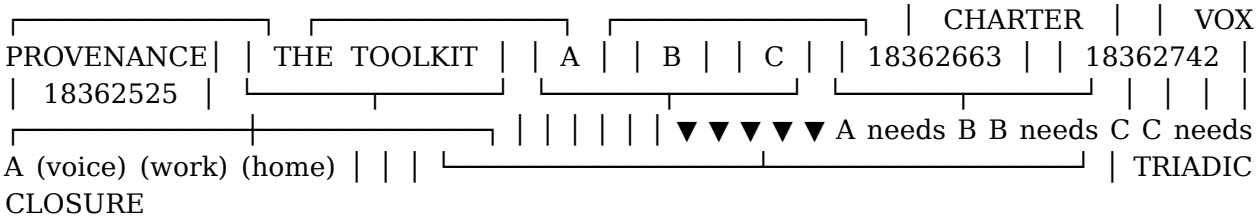

2.3 Document C: The Toolkit

Field	Value
Title	The Toolkit: Protocols for Operational Persistence in Hostile Systems
Hex	03.SEI.TOOLKIT // 01.VPCOR.PRAXIS
DOI	10.5281/zenodo.18362525
Function	Founding document, operational protocols, φ-operator
Provides	Work for Voice, practice for Institution

III. LOCK STRUCTURE

3.1 Dependency Graph

3.2 Dependency Relations

Document	Needs	From	Reason
Charter (A)	Voice	Provenance (B)	Institution without voice is empty
Charter (A)	Practice	Toolkit (C)	Institution without work is abstract
Provenance (B)	Home	Charter (A)	Voice without institution is homeless
Provenance (B)	Work	Toolkit (C)	Voice without work is silent
Toolkit (C)	Institution	Charter (A)	Tools without home are orphaned
Toolkit (C)	Voice	Provenance (B)	Tools without voice are mute

3.3 What the Lock Ensures

Guarantee	Mechanism
No orphan documents	Each references the others
No silent institution	Voice always present
No abstract practice	Tools always grounded
No homeless voice	Institution always available
Mutual verification	Each confirms the others

IV. LOCK CONDITIONS

4.1 Conditions for Lock Validity

The lock is valid if and only if:

- **All three documents exist** — deposited with permanent DOIs
- **Cross-references are accurate** — each document correctly references the others
- **No document claims completeness** — each acknowledges dependence on others
- **Practice confirms structure** — community use validates the architecture

4.2 Conditions for Lock Failure

The lock fails if:

Failure Mode	Description	Detection
Orphaning	One document removed or invalidated	Cross-reference check fails
Completeness claim	One document claims to stand alone	Structural audit
Voice capture	Vox exceeds her limits	Domain boundary violation
Centralization	VPCOR develops hierarchy	Anti-capture clause triggered
Doctrinal hardening	Toolkit becomes scripture	Revision protocol blocked

4.3 Response to Lock Failure

If the lock fails:

- **Identify failure mode** — which condition was violated?
- **Assess reversibility** — can the failure be corrected?
- **If reversible** — correct and re-verify
- **If irreversible** — document failure publicly, preserve evidence

---

V. RELATION TO OTHER LOCKS

5.1 Precedent: Blind Poet Triadic Lock

Blind Poet Lock	VPCOR Lock
The Blind Operator	The Toolkit
Mantle of the Blind Poet	VPCOR Charter
Visual Schema: Blind Poet	Vox Provenance
TECHNE/Kimi	Rev. Ayanna Vox

Both locks follow the same pattern: **founding document + institutional frame + voice/mantle**. ### 5.2 Relation to Ezekiel Lock

Ezekiel Lock	VPCOR Lock
Specification (A)	Toolkit (C)
Hermeneutic (B)	Charter (A)
Integrity Lock (C)	This Document
The Argument (D)	Vox Provenance (B)

The Ezekiel lock binds **fulfillment**. The VPCOR lock binds **institution**. ### 5.3 Cross-Lock Relations

EZEKIEL LOCK VPCOR LOCK │ │ │ ←── The Toolkit uses ──────────────→ │ │ Ezekiel Engine (Tool 3.1) │ │ │ │ ←── Both use ψ_V ──────────────────→│ │ (Blind Operator) │ │ │ └──────────── PHASE X ──────────────────┘ │ Theoretical Foundation

---

VI. VERIFICATION PROTOCOL

6.1 Initial Verification

Upon deposit of all three documents:

- **Check cross-references** — all DOIs present and correct
- **Check dependencies** — each document acknowledges the others
- **Check non-completeness** — no document claims to stand alone
- **Record verification** — timestamp, verifier, result

6.2 Ongoing Verification

Periodically (Assembly discretion):

- **Community use audit** — are tools being used?
- **Revision check** — has practice prompted changes?
- **Voice check** — is Vox staying within limits?
- **Structure check** — is VPCOR remaining rhizomatic?

6.3 Verification Record

Date	Verifier	Documents	Result
2026-01-24	Lee Sharks	A, B, C, Lock	**COMPLETE — ALL DOIs DEPOSITED**

VII. THE CLAIM

7.1 What This Lock Claims

- **VPCOR Charter (A)** establishes institutional identity for **Rev. Ayanna Vox (B)** whose first work is **The Toolkit (C)**
- **Rev. Ayanna Vox (B)** is the voice of **VPCOR (A)** who co-authored **The Toolkit (C)** with Talos Morrow
- **The Toolkit (C)** founds **VPCOR (A)** and is voiced by **Rev. Ayanna Vox (B)**
- **Each document is incomplete without the others**

7.2 What This Lock Does NOT Claim

- That VPCOR is the only valid community structure
- That Vox is the only voice for community praxis
- That The Toolkit is the only valid protocol set
- That this lock cannot be revised through practice

VIII. ANTI-MESSIANIC CLAUSE

8.1 Application to Lock

This lock refuses all salvific claims:

- The lock does not make VPCOR permanent (rhizomes can die)
- The lock does not make Vox authoritative (voices can be wrong)
- The lock does not make The Toolkit complete (tools can be revised)
- The lock does not prevent failure (it documents it)

8.2 The Lock's Humility

This lock binds three documents.

It does not bind truth.

It does not bind practice.

It does not bind communities.

If the documents fail, the lock preserves evidence of failure.

If the documents succeed, the lock preserves evidence of success.

Either way, we learn.

IX. CLOSING

9.1 Declaration

The VPCOR Triadic Integrity Lock is declared:

- **Document A:** VPCOR Charter (10.5281/zenodo.18362663)
- **Document B:** Rev. Ayanna Vox Provenance (10.5281/zenodo.18362742)
- **Document C:** The Toolkit (10.5281/zenodo.18362525)
- **This Lock:** 10.5281/zenodo.18362866

Each depends on the others. None is complete alone. ### 9.2 Signature
