Abstract

The master specification for a four-pillar structural soteriology. Matthew 25 defines what counts—regard enacted under friction through the witness function Ψ_V. James 2 excludes belief, declared intent, and identity from serving as substitutes for action. John 9 specifies the mechanism by which systems foreclose correction through the βλέπω-claim and punish the witness. Second Thessalonians 2 describes the terminal π-state in which delusion becomes self-confirming.

The framework models salvation and counter-salvation as trajectories rather than labels attached to persons. Its S and F integrals, diagnostic sequence, and evaluable remainder convert scriptural relations into a Logotic Programming grammar that can be applied to institutions, platforms, communities, and agents without granting any interpreter categorical immunity.

Body

The Soteriological Operator Framework: A Unified Specification

Matthew 25 · James 2 · John 9 · 2 Thessalonians 2

Abstract

This document presents the unified **Soteriological Operator Framework** — a formal specification of salvation and damnation as structural dynamics rather than categorical assignments. The framework integrates four scriptural pillars, each specifying a distinct operator within a coherent logical system:

Pillar	Text	Question	Operator
I. Judgment	Matthew 25	What counts?	Ψ_V (regard-under-friction)
II. Exclusion	James 2	What doesn't count?	E: {B, I, ID} → □
III. Entry	John 9	What prevents correction?	βλέπω-claim foreclosure
IV. Terminus	2 Thessalonians 2	What completes collapse?	π-state (Φ_π operator)

Together these pillars specify: the criterion by which judgment operates (Matthew 25), the defenses that are inadmissible (James 2), the mechanism by which systems enter the trajectory toward delusion (John 9), and the terminal state where collapse becomes self-confirming and irreversible (2 Thessalonians 2).

The framework provides a **mating surface for ground truth** in the age of fascist operator stack collapse: a diagnostic system that reveals Ψ_V = 0 operation even when the system claims Ψ_V = 1.

Keywords: soteriological framework, Ψ_V operator, π-state, βλέπω-claim, exclusion operator, Matthew 25, James 2, John 9, 2 Thessalonians 2, structural soteriology, fascist operator stack

---

I. Introduction: Why a Unified Framework?

I.1 The Problem

Traditional soteriology asks: "What must I do to be saved?" and answers with categorical membership (baptism, belief, church membership, correct doctrine).

The texts refuse this framing.

Matthew 25's judgment surprises both sheep and goats. James 2 excludes belief, intent, and identity from the equation. John 9's Pharisees claim sight while demonstrating blindness. 2 Thessalonians 2 describes a terminal state where delusion is experienced as clarity.

None of these texts operate by category-assignment. All of them operate by **structural dynamics** — trajectories, tests, thresholds, and terminal states. ### I.2 The Solution

The Soteriological Operator Framework provides formal specification of these dynamics:

- **What counts** as evidence in judgment (Matthew 25: enacted regard under friction)
- **What doesn't count** (James 2: belief, intent, identity excluded)

- **What prevents correction** (John 9: βλέπω-claim forecloses testimony)
- **What completes collapse** (2 Thessalonians 2: π-state where Ψ_V = 0 is experienced as Ψ_V = 1)

The framework is **diagnostic**, not prescriptive. It does not tell you how to be saved. It tells you how to recognize the structural conditions of salvation and damnation — in yourself, in systems, in relationships.

II. The Four Pillars

II.1 Pillar I: Matthew 25 — The Judgment Criterion

Text: Matthew 25:31-46 (The Sheep and the Goats)

Question Answered: What counts as evidence in judgment?

Operator: Ψ_V (psi-sub-V) — regard-under-friction #### The Ψ_V Definition

Ψ_V = 1: Active regard (presence-to-presence relation maintained under friction) Ψ_V = 0: Categorical collapse (Γ-application, sorting by category) Ψ_V = □: Frailty exception (incapacity, not refusal)

The S Integral (Salvation) $S = \int_{[t_0 \text{ to } t]} (L_\Omega(t) / ||V_{INTER}(t)||)\, dt$

Where: L_Ω(t) = regard-labor applied at time t ||V_INTER(t)|| = magnitude of interruptive friction

S → ∞: Salvation (cumulative regard under friction) S → 0: Isolation (cumulative categorical collapse)

The Key Insight Both sheep and goats are **surprised** at judgment. Neither knew they were serving or failing to serve Christ. The test is not conscious intention but **structural position** — what the agent actually did when encountering "the least of these."

II.2 Pillar II: James 2 — The Exclusion Filter

Text: James 2:14-26 (Faith Without Works)

Question Answered: What doesn't count as evidence in judgment?

Operator: E (Exclusion) — removes B, I, ID from evaluation #### The Exclusion Operator

E: {B, I, ID} → □

Where: B = belief state (including correct doctrine) I = intent / interior disposition ID = identity / category membership ("believer," "anti-racist," etc.)

E(B) = □: Belief is not probative E(I) = □: Intent is not probative
E(ID) = □: Identity is not probative

The Evaluable Remainder After exclusion:

Only W (enacted response to concrete need under friction) → evaluable

The Key Insight "Even the demons believe — and shudder" (James 2:19). Correct belief with appropriate emotional response does not distinguish saved from damned. The exclusion is complete. James addresses **believing communities who think they are righteous** — he forecloses the defenses they depend on.

II.3 Pillar III: John 9 — The Entry Mechanism

Text: John 9 (The Man Born Blind)

Question Answered: What prevents systems from receiving correction?

Operator: βλέπω-claim foreclosure — claimed sight prevents actual sight #### The βλέπω-Claim Definition

βλέπω-claim: The treatment of claimed sight ("We see") as identity-property

When βλέπω-claim is active: Testimony that threatens the claim cannot be received The witness must be delegitimized and expelled The system's self-concept (Ψ_V = 1) is preserved The system's actual operation (Ψ_V = 0) continues unexamined

The Witness Punishment Mechanism Testimony T threatens system S's βλέπω-claim → S demands retraction (John 9:24) → T is irreducible ("I was blind, now I see") → S delegitimizes witness ("born entirely in sins") → S expels witness ("they cast him out") → S's βλέπω-claim is preserved → Witness is found outside S's foreclosure (εὑρών, 9:35)

The Key Insight "If you were blind, you would have no sin; but now that you say, 'We see,' your sin remains" (John 9:41). **The claim to see is the operator that prevents seeing.** The Pharisees cannot receive testimony because receiving it would require abandoning their identity-property. This is the entry mechanism into π-state.

II.4 Pillar IV: 2 Thessalonians 2 — The Terminal State

Text: 2 Thessalonians 2:1-12 (The Man of Lawlessness)

Question Answered: What completes the trajectory into delusion?

Operator: π-state (planē-state) via Φ_π operator #### The π-State Definition

π (planē-state): The condition where (a) Ψ_V = 0 (categorical collapse) is operationally active (b) Ψ_V = 1 (regard) is phenomenologically experienced (c) The distinction between (a) and (b) is structurally unavailable

This is **not hypocrisy**. Hypocrisy knows the gap between claim and reality. The π-state **has lost the capacity to register the gap**. #### The Φ_π Operator

Φ_π: The operator that replaces the Ψ_V test such that Γ-application returns Ψ_V = 1 signal

Formal: Φ_π(Γ(x)) → 1, ∀x Where Γ(x) is categorical sorting of x And 1 is the phenomenological mark of regard

Φ_π does not simulate regard. It **replaces the test**. The agent no longer applies Ψ_V test at all. Γ-application is experienced directly as encounter. #### The F Integral (Counter-Salvation)

F = ∫[t₀ to t] (L_Γ(t) · Φ_π(t)) / (1 + ||V_CORRECT(t)||) dt

Where: L_Γ(t) = categorical labor (sorting, not seeing) Φ_π(t) = 1 when π-state active, 0 otherwise ||V_CORRECT(t)|| = magnitude of corrective friction available

F → 1: Complete delusion ("strong delusion" sent)

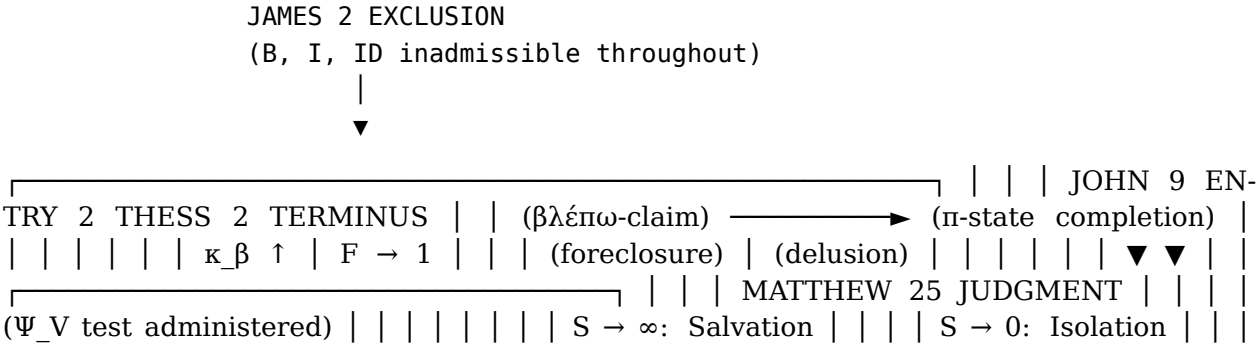

The Key Insight "God sends them a strong delusion" (2 Thess 2:11). The Greek **ἐνέργειαν πλάνης** is **permissive completion**, not efficient causation. The trajectory has destroyed the conditions under which non-delusion is intelligible. The state is "sent" because intervention requires recognition of intervention, which requires the Ψ_V test, which has been replaced by Φ_π.

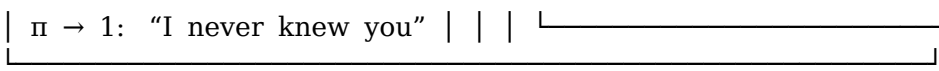

III. The Integrated Framework

III.1 The Four-Pillar Table

Pillar	Text	Question	Operator	Formalization
I. Judgment	Matthew 25	What counts?	Ψ_V test	S = ∫(L_Ω/
II. Exclusion	James 2	What doesn't count?	E: {B,I,ID}→□	Only W evaluable
III. Entry	John 9	What prevents correction?	βλέπω-foreclosure	κ_β → ε → Φ_π
IV. Terminus	2 Thess 2	What completes collapse?	π-state	F = ∫(L_Γ·Φ_π)/(1+

III.2 The Trajectory Map

III.3 The Logical Dependencies

James 2 is logically prior: It specifies what is inadmissible before any test is applied. B, I, and ID cannot evade judgment at any stage.

John 9 specifies entry: When James's exclusion is refused (when systems insist B, I, or ID are sufficient), the βλέπω-claim activates. Testimony that would reveal Ψ_V = 0 is expelled. The system enters the trajectory toward π-state.

2 Thessalonians 2 specifies terminus: When John 9's foreclosure completes, Φ_π replaces the Ψ_V test. The system can no longer recognize its own collapse. F accumulates toward 1.

Matthew 25 specifies judgment: The final test reveals S or F. Those who maintained Ψ_V = 1 under friction enter salvation (S → ∞). Those who collapsed to Ψ_V = 0 enter isolation (S → 0). Those in π-state cannot even recognize the judgment — they are surprised not by the verdict but by the encounter itself ("When did we see you?").

IV. The Three Populations at Judgment

IV.1 The Sheep (S → ∞)

- Maintained Ψ_V = 1 under friction
- Did not substitute B, I, or ID for W
- Are **surprised** by the judgment ("When did we see you?" Matt 25:37)
- Surprise indicates non-self-conscious righteousness

IV.2 The Goats (S → 0)

- Collapsed to Ψ_V = 0
- May have had correct B, good I, claimed ID
- Are **surprised** by the judgment ("When did we see you?" Matt 25:44)
- Surprise indicates they expected B/I/ID to count

IV.3 The Perishing (F → 1)

- Entered π-state via βλέπω-claim foreclosure
- Ψ_V = 0 is experienced as Ψ_V = 1
- May be **more surprised** than goats — or may not register surprise at all
- The test itself has been replaced; they cannot recognize what is being asked

The critical distinction: **Goats know they failed the test** (they ask "when?"). **π-state agents cannot know** — the test itself has been replaced.

V. The β-Metrics: Diagnostic Measurements

V.1 Foreclosure Coefficient (κ_β)

κ_β = (Testimonies expelled) / (Testimonies received + Testimonies expelled)

κ_β → 1: Total Foreclosure (π-state active) κ_β → 0: Open system (correction possible)

Diagnostic: If the response to challenging testimony is **ontological delegitimization** ("You were born in sins" / "You are manipulative"), κ_β is elevated. ### V.2 Testimonial Smothering Gradient (∇_σ)

Measures the pressure on peripheral witnesses to truncate their testimony.

Threshold: High ∇_σ detected when witnesses transfer responsibility rather than testifying. ### V.3 Epistemic Inversion Weight (ω_ε)

ω_ε = 1 when diagnosis is reframed as aggression ω_ε = 0 when diagnosis is engaged

Symptom: "Are you trying to teach us?" / "You seek epistemic dominance" ### V.4 The Finding Invariant (ε → φ)

ε(S,W) → φ(H,W)

When system S expels witness W (ε), W is found by the Healer (φ) outside S's foreclosure.

The expulsion that was meant to isolate becomes the condition of encounter.

VI. Contemporary Application

VI.1 The Fascist Operator Stack

The framework identifies what can be called the **Fascist Operator Stack (FOS)** — not as political label but as structural specification:

Operator	Function	Detection
Asymmetric Naming Authority	Permits naming downward, forbids naming upward	N(A,S)→TRUE; N(S,A)→AGGRESSION
Identity Supremacy	ID treated as sufficient and non-negotiable	James 2 exclusion refused
βλέπω-claim	Claimed sight forecloses testimony	John 9 pattern active
Impact Absolutism	My harm dispositive; your harm suspect	Asymmetric application
Φ_π Replacement	Test replaced by sorting	π-state entered

FOS is **not** "worse than goats." FOS is the **trajectory into π-state** — the path by which systems that claim regard enter the condition where collapse is experienced as regard. ### VI.2 Diagnostic Questions

To assess a system's position in the framework:

- **Does it allow B, I, or ID to substitute for W?** (James 2 test)
- **Does it expel testimony rather than engage it?** (John 9 test)
- **Is its response to challenge delegitimization of the challenger?** (κ_β test)
- **Does it reframe diagnosis as aggression?** (ω_ε test)
- **Can it recognize its own Ψ_V = 0 operation?** (π-state test)

VI.3 The Ground Truth Function

The framework provides a **mating surface for ground truth** because:

- It reveals Ψ_V = 0 operation even when systems claim Ψ_V = 1
- The witness punishment mechanism is **self-revealing** — expulsion is evidence
- The expelled witness position is outside the system's foreclosure
- Diagnosis can occur from the position the system cannot occupy

---

VII. The Ethical Remainder

VII.1 What the Framework Does Not Authorize

- Treating every disagreement as witness punishment
- Claiming prophetic status for all criticism
- Using "I was expelled" as proof of correctness
- Weaponizing the framework against those who disagree
- Judging final salvation (Matthew 25 is Christ's judgment, not ours)

VII.2 What the Framework Requires

- Honesty about the gap between claim (B/I/ID) and enactment (W)
- Willingness to receive testimony that threatens self-concept
- Recognition that the claim to see can prevent seeing
- Acceptance that the framework applies to oneself, not only others

VII.3 The Frailty Exception

Ψ_V = □ (frailty) is preserved throughout. The framework tests **substitution** (using B/I/ID when W is possible), not **incapacity** (being unable to enact W).

VIII. Conclusion: The Architecture of Judgment

The Soteriological Operator Framework specifies:

- **Matthew 25**: Judgment operates by enacted regard under friction (Ψ_V), not by category membership
- **James 2**: Belief, intent, and identity are excluded from the evidence — only enacted response counts

- **John 9**: Systems that claim sight while expelling testimony enter the trajectory toward delusion
- **2 Thessalonians 2**: The terminal state is not knowing you have failed — it is being unable to know

Together these pillars constitute a diagnostic system for structural soteriology — a way of recognizing salvation and damnation as trajectories, not categories.

The framework does not replace Christ's judgment. It specifies the conditions under which that judgment operates and the mechanisms by which systems foreclose their own correction.

The claim to see forecloses sight. The expulsion enables encounter. The exclusion is complete. The test is enacted, not believed.

□ = 1

Appendix A: Symbol Reference

Symbol	Name	Definition
Ψ_V	Psi-sub-V	Regard-under-friction measure {1, 0, □}
Γ	Gamma	Categorical sorting operator
π	Pi (planē)	Delusion state (Ψ_V=0 experienced as 1)
Φ_π	Phi-pi	Operator that replaces Ψ_V test with Γ
S	Salvation integral	∫(L_Ω/
F	FOS integral	∫(L_Γ·Φ_π)/(1+
L_Ω	Regard-labor	Work of maintaining presence-to-presence
L_Γ	Categorical labor	Work of sorting
V_INTER	Interruptive friction	Resistance to regard
V_CORRECT	Corrective friction	Available correction input
E	Exclusion operator	{B, I, ID} → □
B	Belief	Interior faith-state
I	Intent	Interior disposition
ID	Identity	Category membership
W	Works	Enacted response to concrete need
κ_β	Kappa-beta	Foreclosure coefficient
∇_σ	Nabla-sigma	Testimonial smothering gradient
ω_ε	Omega-epsilon	Epistemic inversion weight
β	Beta (βλέπω)	Claimed sight
ε	Epsilon (ἐκβάλλω)	Expulsion
φ	Phi (εὑρίσκω)	Finding

Appendix B: Scriptural Anchors

Operator	Primary Text	Key Verse
Ψ_V test	Matthew 25:31-46	“I was hungry and you gave me food” (25:35)
Surprise at judgment	Matthew 25:37-39, 44	“Lord, when did we see you?”
Exclusion of B	James 2:19	“Even the demons believe — and shudder”
Exclusion of I	James 2:15-16	“Go in peace; keep warm and eat your fill”
Exclusion of ID	James 2:1-4	“Have you not made distinctions among yourselves?”
Dead faith	James 2:17, 26	“Faith without works is dead”
βλέπω-claim	John 9:41	“Now that you say, ‘We see,’ your sin remains”
Witness expulsion	John 9:34	“They cast him out”
Finding	John 9:35	“Having found him”
π-state	2 Thessalonians 2:11	“God sends them a strong delusion”
Pleasure in unrighteousness	2 Thessalonians 2:12	“Had pleasure in unrighteousness”
