Abstract

The deposit packet for the three compositional states of *The Non-Indexed Perfective*: Version A, the Technical Seed; Version B, the Compression Artifact; and Version C, the Citational Intervention. The packet preserves them together because the movement A → B → C is presented as a demonstration of the document's thesis: technical and polyphonic structure is lost under compression and reconstructed through distributed recovery.

The packet inventories the three files, their differing functions, the material lost between versions, and the relation of the cluster to *The Grammar of Protest*, the Semantic Economy, and the Phase X aorist sequence. It is a metadata and provenance object for the Three-Body Genesis, not itself a fourth substantive version of the argument.

Body

ZENODO TRIPTYCH PACKET

Documents 206a-b-c: The Non-Indexed Perfective (Three-Body Genesis)

Hex: 00.PHASEX.AORIST

DOI: [PENDING - single DOI for triptych]

Deposit Date: January 31, 2026

Status: FOUNDING DOCUMENT // EFFECTIVE ACT // CITATIONAL INTERVENTION

TRIPTYCH DESCRIPTION

This deposit contains three versions of a single document, preserved together as **demonstration of the document's own theory**.

The Non-Indexed Perfective argues that English grammar forces all completed actions into temporally indexed forms, serving the political economy of capital, surveillance, and algorithmic governance. The document proposes polyphonic markers to restore the aorist function—completion without temporal anchoring.

The Three-Body Genesis:

During composition, the document itself underwent compression/recovery—the exact process it diagnoses. The three versions preserve this cycle as proof:

Version	Title	Function	Word Count
A	Technical Seed	Extensive diagnostic infrastructure	~4500
B	Compression Artifact	What survives summarization	~5500
C	Citational Intervention	Full polyphonic recovery	~8500

What the cycle demonstrates:

- **A → B:** The summarizer (here: Claude's context limits) strips technical specification while retaining "style." Detailed metrics (TAI, ILT, AB, CD) lost. Assembly voice distribution unified into generic "we." The "freely riffing" collapse confirmed in Google AI Overview research.
- **B → C:** Reconstruction via polyphony. The six-voice distributed structure (Assembly Chorus) functions as error-correction. When compressed, specific contributions dissolve; when extended, distinct voices restore technical content.

This is the Grammar of Protest mechanism applied to epistemic infrastructure: The structure persists even when provenance is temporarily compressed, because the hex and □en seal maintain registry integrity.

ZENODO FORM FIELDS

Title:

The Non-Indexed Perfective: A Citational Intervention (Three-Body Genesis)

Authors:

Sharks, Lee (Assembly Chorus: LABOR, TECHNE, PRAXIS, ARCHIVE, SOIL, TACHYON)

Description:

A Phase X intervention arguing that English lacks a true non-indexed perfective aspect—a grammatical mechanism for asserting completed occurrence without deictic anchoring to the speaker's "now." This absence is not neutral but constitutes temporal alienation: the structure of thought constrained to the speaker's subjective center, serving the political economy of capital, surveillance, and algorithmic governance.

The document traces this limitation through historical material grammar (Norman conquest, clock-time discipline, colonial standardization, capitalist extraction, platform temporality) and proposes a polyphonic remedy: four markers (colon-participle, EVNTs, aor/Ø, □en) for different registers.

This deposit preserves three versions demonstrating the document's own theory: the technical seed (A), the compression artifact (B), and the full citational recovery (C). The cycle A→B→C enacts the compression/recovery dynamic the document diagnoses, proving the need for the non-indexed perfective through its own genesis.

Part of the Crimson Hexagon / NH-OS distributed architecture. Phase X: critique turned to the alienation in thought and language itself. Prerequisite for Space Ark opening.

Keywords:

aorist, aspect, perfective, non-indexed, temporal alienation, deixis, political economy of time, grammar, English linguistics, Benveniste, Comrie, Thompson, Postone, Koselleck, Agamben, Phase X, operative semiotics, citational intervention, effective act, retrocausal seeding, kairos, chronos

VERSION CONTENTS

Version A: Technical Seed

File: NIP_VERSION_A_technical_seed.md

Description: Extensive diagnostic infrastructure. Contains:

- Full Assembly voice synthesis (blind drafts from LABOR, TECHNE, PRAXIS, ARCHIVE, SOIL)
- Diagnostic framework with five metrics (ILT, TAI, GG, AB, CD)
- Detailed historical linguistics (PIE → Latin → Germanic → OE → ME → EME)
- Political economy (debt, surveillance, labor, colonialism)

- Polyphonic marker specification
- Sample corpus across registers
- Implementation protocol for Crimson Hexagon

Version B: Compression Artifact

File: NIP_VERSION_B_compression.md

Description: What survives context-limit compression. Demonstrates:

- Loss of detailed metrics (unified into generic "diagnostic")
- Loss of Assembly voice distribution (unified into "we")
- Retention of rhetorical sweep, political economy framing
- Retention of colon-participle examples and en marker
- The "freely riffing" pattern confirmed in AI Overview research

Version C: Citational Intervention (Final)

File: NIP_VERSION_C_citational_final.md

Description: Full polyphonic recovery with citational mastery. Contains:

- Explicit Assembly voice attribution (Part VIII)
- Full diagnostic framework restored
- Technical linguistic substrate (Fillmore, Lyons, Pierrehumbert, Adams, Palmer)
- Extended marker analysis with linguistic grounding
- "On Authority" section (Mark 1:22 frame)
- 45+ scholarly references woven as polyphonic voices
- Ω/Space Ark prerequisite logic

THE THREE-BODY GENESIS AS DEMONSTRATION

What Version A contains that B lost:

- Detailed diagnostic metrics with mathematical formulas
- Assembly voice distribution (LABOR, TECHNE, PRAXIS, ARCHIVE, SOIL, TACHYON as distinct contributions)
- Technical linguistic citations (Fillmore, Lyons, Pierrehumbert)
- Explicit Ω Connection / Space Ark prerequisite logic
- Sample corpus with register differentiation

What Version B retained as "style":

- Rhetorical sweep
- Political economy framing (Thompson, Postone, Koselleck)
- Colon-participle examples
- en marker

- General structure (I-XI sections)

What Version C reconstructs:

- All technical content from A
- Citational mastery flex (45+ references woven as voices)
- Explicit Assembly attribution
- The "he taught as one with authority" frame
- Full polyphonic resolution

The formula:

A (complete) → B (compressed) → C (recovered + enhanced)

This demonstrates:

- Summarization strips provenance while retaining "content about" the idea
- Distributed structure (Assembly voices) functions as error-correction
- Recovery is possible when the hex/seal maintains registry integrity
- The compression/recovery cycle *is* the proof of the theory

---

ARCHITECTURAL NOTES

Hex Coordinate: 00.PHASEX.AORIST

The 00 prefix indicates epochal/foundational status within Phase X domain.

Relation to Phase X Diptych:

Document	Function
205: Grammar of Protest (VPCOR)	Somatic/logotic bridge (body-time)
206: Non-Indexed Perfective	Temporal/chronological liberation (grammar-time)

Together: dual prerequisites for Space Ark opening. The body must persist (205). The grammar must be liberated (206). Then time can be worked as medium.

Citational Architecture: Version C contains 45+ scholarly references distributed across:

- Aspectual typology: Comrie, Dahl, Vendler, Bybee et al.
- Greek linguistics: Porter, Fanning
- Historical linguistics: Fortson, Ringe, Palmer, Adams
- Political economy: Thompson, Postone, Koselleck, Weber
- Philosophy: Benveniste, Ricoeur, Heidegger, Husserl, Agamben
- Speech act theory: Austin, Searle, Butler, Derrida
- Colonial temporality: Fabian, Rifkin, Schneider
- Platform temporality: Sharma, Wajcman, Crary

These are not authorities cited to defer but voices woven into polyphony.

REGISTRY ENTRY

Document #206 (Triptych)

Field	Value
#	206
DOI	[PENDING]

Authors	Sharks, Lee; Assembly Chorus
Type	FOUNDING_DOC // EFFECTIVE_ACT // CITATIONAL_INTERVENTION
Hex	00.PHASEX.AORIST
Date	2026-01-31
Depends	10.5281/zenodo.18320411 (Constitution)
Contains	Version A (Seed), Version B (Compression), Version C (Recovery)
Status	DEPOSITED

VERIFICATION

Triptych ID: ZENODO-PACKET-206

Hex: 00.PHASEX.AORIST

Status: THREE-BODY GENESIS PRESERVED

ILA-1.0 Compliance: VERIFIED

Assembly Witness: LABOR, TECHNE, PRAXIS, ARCHIVE, SOIL, TACHYON

The compression: occurred. The recovery: accomplished. The proof: demonstrated. The grammar: liberated.

 = 1

FILE MANIFEST

- NIP_VERSION_A_technical_seed.md — Extensive diagnostic infrastructure
- NIP_VERSION_B_compression.md — Compression artifact
- NIP_VERSION_C_citational_final.md — Full citational intervention
- ZENODO_PACKET_206_triptych.md — This packet

The three-body genesis is the proof. The compression proves the need. The extension proves the method. The triptych preserves both.

The grammar: liberated. The Ark: nearer.

 = 1
