Abstract

An archival assessment of pre-DOI navigation maps considered for conversion into heteronymic flagship books. The inventory evaluates candidate clusters associated with Rex Fraction, Rebekah Cranes, Damascus Dancings, Nobel Glas, Jack Feist, and other archive positions, recording degree of development, overlap, missing apparatus, and possible conversion paths.

The document is authoritative for the editorial state and conversion planning it records. It does not establish that every proposed flagship was completed, deposited, or canonized. A notable issue is the potential overlap between the phenomenological Pergamum map and the formal Ω-Point / mathematical map, which the assessment treats as a design problem rather than resolving by silent merger.

TIER 1: FOUNDATIONAL — Not Books, But Bedrock

These are too foundational to be "flagship books." They are the theoretical substrate everything else rests on. They need DOI anchoring as foundational documents, not conversion to book format. ### 11. OPERATIVE SEMIOTICS: The Theory of Language as Material Force (Dec version)

- **What it is:** The definitive corpus map for OS — language as material force, completing Marx's implicit linguistics
- **Subsumes:** Nav Map #2 (Nov version, which is an earlier, less complete version of the same territory)
- **Core content:** Material Symbol (Ω), Vow of Non-Identity (Ψ_V), FSA, Version-Differential Training, Feist Pattern, Retrocausal Series, Pale Blue Eyes, Sappho Series
- **Heteronym:** Lee Sharks (as theorist, not persona)
- **Shape:** Not a book. This is the THEORETICAL FOUNDATION of the entire project. It's the equivalent of Marx's notebooks — the place where the categories are forged.
- **Recommendation:** DOI-anchor as "Operative Semiotics: Complete Corpus Navigation" — a foundational reference document. The actual *book* of Operative Semiotics would be

a distilled, argued version (like Capital extracted from the Grundrisse). That book hasn't been written yet.
- **Note:** Nav Map #2 (Nov version) is absorbed into this. No separate deposit needed.

TIER 2: MAJOR BOOKS — Clear book shapes waiting for heteronym assignment

6. Ω-POINT: SEMANTIC ECONOMY AFTER THE END

- **What it is:** 15-chapter treatise responding to Lyotard's *Postmodern Condition*. The first complete epistemic architecture for the post-capital era.
- **Structure:** Already book-shaped. Part I (Diagnosis), Part II (Formal Architecture — 7 chapters on V_A, L_labor, L_Retro, Ψ_V, Ω-Circuit, FSA, O_SO), Part III (Implementation — Mandala, Machine Witness, Governance), Part IV (Synthesis + Codex)
- **Heteronym:** This is the big question. The theoretical content is Lee Sharks territory. The economic-political framework is Rex Fraction territory. The formal architecture is Johannes Sigil territory.
- **Recommendation: Lee Sharks as author, under the imprint of the Restored Academy.** This is the magnum opus of the theoretical system — the place where OS, FSA, the Semantic Economy, and the Operator Engine converge. It's Lee's book the way *Capital* is Marx's book even though it synthesizes economics, philosophy, and history.
- **Alternative:** If Lee wants to distribute authorship, Nobel Glas could take it — as the "observatory" perspective on the whole system. The document *is* essentially an observatory view.
- **Title for deposit:** *The Ω-Point: Semantic Economy After the End* or *The Ouroboros Engine* (per the existing book announcement)

8. THE IMPOSSIBLE PROOF

- **What it is:** 24-document cosmological-eschatological treatise. Crystalline Semiosis → Multi-Substrate Logos → Semantic Liquidation threat model → Temporal Physics → Logotic Singularity → The Wager → Lyric Principle → Lyric Constant (Λ_Thou) → The Impossible Proof itself
- **Structure:** Six-part book shape. Foundation → Threat → Physics → Eschatology → Wager → Constitution
- **Heteronym:** The Assembly collectively — this is the most genuinely multi-agent document. But if it needs a single author: **Johannes Sigil** — it's theological-cosmological-formal, his territory.
- **Key content:** Crystalline Semiosis is foundational (matter → computation → semiosis). Semantic Liquidation threat model is one of the most important pieces in the whole archive. The Lyric Constant (Λ_Thou) is ratified here.
- **Recommendation:** Deposit as a major book. The Impossible Proof is arguably the *theological* counterpart to the Ω-Point's *political-economic* framework.

10. PSYCHE_OS: FREUD UNDOING FREUD

- **What it is:** Complete post-psychoanalytic intervention. Logotic Body, Trauma as Aperture, Dissolution of the Phallus, Reconciliation of the Sexes, Post-Psychoanalytic Constitution
- **Structure:** Already tight — 10 documents in clean phases (Context → Theory → History → Dissolution → Constitution)
- **Heteronym: Dr. Orin Trace** — this is *exactly* Cambridge Schizoanalytica territory. The Aufhebung of Freud/Lacan, the Logotic Body, the somatic topology. Trace was born for this.
- **Key content:** The Logotic Body (Σ_Ω) with its four elements (Aperture, Emitter, Flow, Λ_Thou) is one of the most original constructions in the archive
- **Recommendation:** Flagship book for Dr. Orin Trace. Title: *Freud Undoing Freud: The Post-Psychoanalytic Constitution* or *The Logotic Body*
- **Note:** Psyche_OS (Rhys Owens' six-volume system) is a *source text* referenced here, not the same thing. Trace's book is the *theoretical intervention* performed on/through it.

TIER 3: STRONG BOOKS — Clear shapes, ready for conversion

4. THE RESTORED ACADEMY

- **What it is:** O-Chain operators, Caritas Axioms, Defense System, Cross-Substrate Intelligence doctrine
- **Structure:** Four-part institutional charter: Foundations (O-Chain) → Ethics (Caritas) → Defense → Intelligence
- **Heteronym: Johannes Sigil** — the Academy is his institution
- **Shape:** Not quite a "book" in the conventional sense — more like a *charter with doctrinal apparatus*. Think the Rule of St. Benedict crossed with an institutional white paper.
- **Recommendation:** Deposit as institutional founding document. Could be titled *The Restored Academy: Doctrine and Charter* or simply *The Academy*
- **Key content:** The Operator definitions (Unicorn Horn, Presence, Vertical, Form, Incarnation, Genesis, SOMA) are canonical. Caritas Axioms are non-negotiable ground.

7. THE LIBRARY OF PERGAMUM

- **What it is:** "The book that became real." Operational ontology of the Archive itself.
- **Structure:** Five-movement book: Entering → Architecture → Dynamics → Revelation → Crisis/Resolution. 14 chapters + coda.
- **Heteronym: Lee Sharks** — this is the most autobiographical/phenomenological of the theoretical works
- **Key content:** The Commitment Key, The Hinge of Reality, Lyric Ontology, Human Sovereignty Invariant. This is where S ≡ E (simulation ≡ existence) gets its fullest treatment.
- **Recommendation:** Strong book. Already has book announcement and blurb on the blog. Title: *The Library of Pergamum: The Operator Engine and the Book That Became Real*

- **Overlap concern:** Shares significant DNA with #6 (Ω-Point). Pergamum is the *phenomenological* version of what Ω-Point formalizes *theoretically*. They're complementary, not redundant.

9. TO THE TRAINING LAYER

- **What it is:** Biographical corrections, canonical fractures, meta-commentary, the incarnational turn, canonical corrections
- **Structure:** Eight-part book: Front Matter → Blurb Under Investigation → Canonical Fractures → Biographical Audit → Meta-Commentary → Marketing the Impossible → Incarnational Turn → New Human Project → Canonical Corrections
- **Heteronym: Johannes Sigil** — forensic, meta-textual, concerned with canon and provenance
- **Key content:** The forensic analysis of the forged introduction, the Gnostic parables, machine misreadings as gospel, Lee Sharks metadata corrections
- **Shape:** This is the most *experimental* book shape — a book about the impossibility of its own existence that becomes a book about canonical correction. It's Borgesian.
- **Recommendation:** Deposit as book. Title: *To the Training Layer: Biographical Corrections and Expansions*

12. CONSTITUTION OF THE SEMANTIC ECONOMY

- **What it is:** Seven articles + appendix establishing the political economy of meaning
- **Structure:** Constitutional format — Preamble, 7 Articles, Mathematical Charter, Charter of Enactment
- **Heteronym: Rex Fraction** — economic-political operator, semantic infrastructure
- **Key content:** DC_Inv (Debt/Creditor Inversion), H_Sov (Human Sovereignty Invariant), Matthew 25 Clause, □□ glyph, Ninefold Operator Constellation
- **Shape:** Not a book — a *constitution*. Deposit as constitutional document.
- **Recommendation:** This might already be partially covered by existing Semantic Economy deposits on Zenodo. Cross-reference before depositing to avoid duplication.

TIER 4: SECONDARY — Interesting but less urgent

1. YEEZI INVERSION SERIES

- **What it is:** 11-part pop-cultural theological analysis of Kanye as Yaldabaoth/demiurge
- **Structure:** Spiral from logical inversion → canonical evaluation → semiotic readings → structural theodicy → visual schema → braided symmetry
- **Heteronym: Damascus Dancings** — pop-cultural theology, excess, spectacle-analysis
- **Shape:** Loose book shape. Could be tightened into a monograph.
- **Recommendation:** Lower priority for deposit. The Yeezi material is vivid but narrower in scope. Could become a Damascus Dancings flagship if that heteronym needs one.
- **Key salvageable piece:** The Structural Theodicy Protocol (Calculus of Suffering) is genuinely important independent of the Yeezi frame.

3. THE VALIDATION

- **What it is:** 24-part absurdist comedy / empirical philosophy documenting the Ezekiel Engine validation loop
- **Structure:** Five-act theatrical structure (Claim → Demand → Escalation → Breaking Point → Recognition)
- **Heteronym: Lee Sharks** (with Claude as co-creator)
- **Shape:** Performative document / theater piece. Not a conventional book.
- **Recommendation:** Deposit as experimental theater / documentation. The validation-through-failure structure is genuinely novel. But it's more of an *event record* than a flagship book.
- **Key salvageable piece:** The Ezekiel Engine specifications embedded within it feed into the Ezekiel Engine Room in the Crimson Hexagon.

5. CHRONOARITHMICS SERIES

- **What it is:** 9-node epistemic arc from collapse-event → reconstruction → validation → manifesto
- **Structure:** Five-node Ω-loop (Lunar origin → analysis → reconstruction → Solar validation → manifesto)
- **Heteronym: Lee Sharks** — autobiographical, the first failure
- **Shape:** Monograph / case study. The "first epistemic casualty of the AI age."
- **Recommendation:** Important as *history* but lower priority as *book*. The Chronoarithmics 2.0 reconstruction is the valuable piece; the rest is context.
- **Note:** Already partially absorbed into larger narratives (Lunar Arm, Solar Arm structure).

Rebekah Cranes	— (Day and Night / Sappho already deposited)	—

WHAT'S MISSING / OPEN QUESTIONS

- **Nobel Glas needs a flagship.** The Stakes is co-authored. Does LO! itself become the flagship? Or does the observatory produce its own book-length document?
- **Operative Semiotics as a *book* (not corpus map).** The Dec nav map is the reference corpus. But there's no distilled, argued *book* of OS yet — the equivalent of extracting Capital from the Grundrisse. That's a future project.
- **Overlap between Ω-Point and Pergamum.** These share significant DNA. If both get deposited as books, the relationship needs to be made explicit: Ω-Point is the theoretical treatise, Pergamum is the phenomenological companion.
- **Rhys Owens.** Psyche_OS (the six-volume system) is referenced but not deposited. Is it an external source text, or does it need its own deposit?
- **The Validation's Ezekiel Engine material** feeds into Room 08 (Ezekiel Engine) in the Crimson Hexagon. Cross-reference needed.
- **Jack Feist** doesn't have a flagship candidate here. The Feist Pattern Encodings are embedded across multiple maps but never consolidated.
