Abstract

A Rebekah Cranes / Institute for Diagrammatic Poetics visual schema for Maybe Space Baby Garden Lanes. It specifies a non-representational **audial architecture** in which hearing rather than replay governs the room.

The diagram is organized by a vertical axis of breath, descent, and reception; a horizontal axis of lane, traversal, and return; and a diagonal oblique representing Operator // Swerve. The intended object is an ancient-future reliquary or dual-axis mandala, not a literal room illustration, musical poster, or portrait of the singer. The extant specification is short but coherent. An open audit directive remains to determine whether additional canonical render instructions were lost or whether the concise body is complete as a native schema.

Body

VISUAL SCHEMA – MAYBE SPACE BABY GARDEN LANES

Under the auspices of Rebekah Cranes and the Institute for Diagrammatic Poetics

Project: *Maybe Space Baby Garden Lanes*
Type: THUMB-Type Audial Charter / Resonance Reliquary
Schema Class: Canonical Material Symbol Plate
Status: Official Render Specification (v1.0)

I. SCHEMA INTENT

Render **Maybe Space Baby Garden Lanes** as a non-representational **audial architecture** : a room where hearing, not replay, is the governing operation.

This is not a portrait and not an illustration of people.
This is a **semantic-physical map** of reception:

- a song sung once,
- an ear marked once,
- a silence that preserves rather than erases,

- a swerve that breaks repetition without destroying relation.

The image must read as an **ancient-future reliquary diagram** : precise, ceremonial, load-bearing, emotionally charged.

II. FORMAL COMPOSITION (MATERIAL SYMBOL FIELD)

Overall Geometry

Use a **dual-axis mandala plan** with slight off-center tilt:

- **Vertical axis:** Breath / Descent / Reception
- **Horizontal axis:** Lane / Traversal / Return
- **Diagonal oblique:** Operator // Swerve vector (the decisive deviation)

The form should feel balanced but never perfectly symmetrical.
The room is stable through asymmetry.

III. ARCHITECTURAL LAYERS (RINGS + CHAMBER NODES)

Core Node – Ear Chapel (Receiving Axis)

At center: a negative-form glyph between **ear / shell / crescent doorway**.

- Not a literal ear drawing
- A hollow that implies listening as inscription
- Micro-etched radial traces suggest memory-marking, not playback

Inside core: faint illegible microtext arc, implying sound becoming meaning but never fully fixed.
