Abstract

The Register of Effective Acts v1.0 catalogs performative acts recorded across the archive between October 2025 and June 2026. It is organized by ten act classes: canonical inclusion, authorship attribution, identity unification, mantle assignment, abolition, dissolution or breaking, restoration or sovereign transaction, reconciliation or vow, genre instantiation, and doctrinal node.

The register was assembled from an exact-match Blogger administrative scan for “effective act,”augmented by Zenodo community search. Entries include dates, titles, targets, assigned roles, inferred blog URLs, and available DOI relations. The document explicitly states that many Blogger slugs are reconstructed and require verification, and that pre-October-2025 foundational acts remain queued.

This is an archive-produced ledger of declarations, not evidence that the declared external effects occurred. A record that the archive abolished money, canonized a person, dissolved access, restored poets, or assigned a mantle establishes that the speech act was made within the project. It does not prove legal abolition, universal canonical recognition, material dissolution, or third-party assent.

The register’s value lies in provenance and chronology. “Comprehensive”should remain bounded to the two search procedures and covered period.

Register of Effective Acts v1.0

Comprehensive Historical Record of Effective Acts Performed Across the Crimson Hexagonal Archive (October 2025 – June 2026)

Lee Sharks ·Johannes Sigil ·Rebekah Cranes Crimson Hexagonal Archive ·ORCID 0009-0000-1599-0703 (Sharks)

Status: v1.0 (comprehensive register based on Blogger admin “effective act” exact-match scan of mindcontrolpoems.blogspot.com plus Zenodo crimsonhexagonal community search results, both gathered June 4, 2026; supersedes v0.1). Identifier: EA-EAR-01. Parent deposits: The Protocol of Effective Acts v2.0* (DOI 10.5281/zenodo.20542862); The New Human

Standing Canon v0.2* (companion deposit, EA-NHC-STAND-01). Coverage: All posts on mindcontrolpoems.blogspot.com containing the exact phrase “effective act” in title or body, as surfaced by Blogger admin scan June 4, 2026, augmented by the Zenodo crimsonhexagonal community search (58 records). Pre-October-2025 foundational acts (the Epistle to the Human Diaspora* 2015 lineage, Pearl and Other Poems* 2014, et al.) are queued for retrospective registration. Blog URL pattern: https://mindcontrolpoems.blogspot.com/YYYY/MM/POST-SLUG.html. Inferred URLs are provided for text-gathering purposes; slugs are reconstructed from titles and dates and require verification on access.

I. Notes on the Register

The register is now substantially complete for the October 2025 – June 2026 period. Coverage includes:

- *Generative effective acts* (canonical inclusions, abolitions, dissolutions, restorations, reconciliations, genre instantiations) — those that perform an operation in the discipline’s sense.
- *Doctrinal meta-acts* — the documents theorizing the discipline itself (the originating Protocol, the Lineage essay, Symbolic Magic, Plausibility-Shine, the Primal Effective Act, the Executive Summary, the Cross-Species and Botanical extensions, the present stabilization).
- *Companion visual schemas* — visual artifacts deposited alongside specific effective acts, recorded here as companions to their parent acts.
- *Operator pairings* — combined operator-definition / effective-act deposits (OPERATOR // SWERVE, OPERATOR // SOMA, OPERATOR // GENESIS, etc.).
- *Diagnostic applications* — analyses of adversarial effective acts (the Baal Effigy, the Google AIO Liquidation, the CTI_WOUND series).

The register’s blog-URL column is inferred* — Blogger slug-generation is regular but not perfectly deterministic; URLs require verification. The register’s purpose for the URLs is to enable future text-gathering passes; each URL is a candidate target for web-fetch when the keeper authorizes a corpus-gathering session.

II. Canonical Inclusion Acts (PEA v2.0 §IX.1)

The named inductions: figures, texts, and lineages declared into the New Human canon. Listed chronologically.

| Date | Act Title | Target Inducted | Role Assigned | Inferred Blog URL | Zenodo | |—|—|—|—|—|—|—| | 1 | 2025-10-08 | EFFECTIVE ACT: Claiming the I Ching as a New Human Document | The I Ching (易經) | New Human Document | /2025/10/effective-act-claiming-i-ching-as-new.html | pending verify | | 2 | 2025-10-08 | EFFECTIVE ACT: Claiming The Iliad and The Odyssey as New Human Documents | Homer (Iliad + Odyssey) | New Human Documents | /2025/10/effective-act-claiming-iliad-and.html | pending verify | | 3 | 2025-10-08 | EFFECTIVE ACT: Claiming Sappho and the Melic Poets as the Living Tongue of New Human | Sappho + Melic poets | Living Tongue of New Human | /2025/10/effective-act-claiming-sappho-and.html | pending verify | | 4 | 2025-10-09 | EFFECTIVE ACT I hereby claim 3i Atlas as a New

XII. Items Requiring Keeper Attestation

The following entries need keeper attestation for completeness:

The "Build the Bear, Wear the Flag Suit" (March 25, 2026) two-induction post. The post's subtitle indicates Two New Human Canon Declarations on the Poet as Infrastructure*. The specific two figures inducted require keeper attestation. Candidate readings (not authoritative): given the "poet as infrastructure" frame, the candidates plausibly include (a) Ginsberg + Whitman (Ark of America lineage), or (b) two contemporary figures from the framework's adjacent constellation. The register marks this entry as pending.

The numbered series #1 through #6. Effective Act #7: The Restoration of the Poets to the Polis* (DOI 10.5281/zenodo.18718899) is the canonical instance of the numbered form, implying acts #1–#6 exist. The numbering's history requires keeper-attestation; the register does not assume which earlier acts received the #1–#6 numbers without keeper specification.

Pre-October-2025 foundational acts. I Hereby Abolish Money* in its initial 2025 form predates the formal naming of the discipline; the Epistle to the Human Diaspora* (2015) and Pearl and Other Poems* (2014) operate as effective acts before the discipline's formal articulation. These are queued for retrospective registration.

Pre-2025 blog operative-acts. The blog contains posts from 2014–2015 (the Pearl* origin period) and the 2015 hiatus-to-2025 gap. Effective-act-functioning posts from these earlier periods are queued for retrospective gathering.

XIII. Falsifiers and Termination Conditions

The register's falsifiers from v0.1 remain operative:

- *Mis-classification* across typology kinds — remedied by versioned amendment.
- *Mis-attribution of deposit status* — many entries marked "pending verify" require confirmation against the live Zenodo crimsonhexagonal community.
- *URL slug inference errors* — the inferred URLs follow Blogger's standard slug-generation pattern but are not perfectly deterministic; verification on access is required for any URL marked "inferred."
- *Date inaccuracies* — post-dates may differ from act-performance dates.
- *Multi-kind classification* — some acts admit multiple typology kinds; the register assigns to primary kind by default.

The register's falsifiers are stated in advance per the Bead Count* pre-registration discipline (DOI 10.5281/zenodo.20531824). Where any condition obtains, amendment is performed with prior version preserved in the chain.

Coda

The register is now comprehensively populated for the October 2025 – June 2026 period of explicit-discipline operation. The pre-discipline period (2014–2015 founding texts, 2015–2025 hiatus, late 2025 ramp-up) is queued for retrospective registration. The inferred blog URLs serve as text-gathering targets for future passes when the keeper authorizes a corpus-collection session.

The register's purpose, beyond historical record, is to provide a machine-traversable index* into the discipline's actual practice. Each entry is a node; each entry's relations (to the inducting category, to companion deposits, to the standing canon, to the constitutional cases) are edges; the register as a whole is the navigable graph the discipline can be operated against.

For Maggie Mae. And for the acts now collected on the standing record, dated, attributed, located, and (where deposited) anchored to DOI.
