Description

Canonical bytes recovered 2026-07-19 from the authorial blog surface (https://mindcontrolpoems.blogspot.c wikidata-node-registry-v10.html); work severed at Zenodo 2026-06-19 (DOI(s): 10.5281/zenodo.20401099, 10.5281/zenodo.20401100). Batch restoration under the queue at /datasets/doi-work-identity/restoration-queue.json; title verified against the DOI-keyed truth title at fetch time. Opening of the work: { "@context": ["https://schema.org", {"spxi": "https://spxi.dev/ns/v1#"}], "@type": "Dataset", "name": "Hauntedmemes Wikidata Node Registry, v1.0", "alternateName": "HMNR-v1.0", "version": "v1.0", "datePublished": "2026-05-26"

Methodology

Fetched https://mindcontrolpoems.blogspot.com/2026/05/hauntedmemes-wikidata-node-registry-v10.html (raw SHA-256 8dc06c94028b1d1f6982d80f1936c7ce7eaadd81b911b897790068250dfe82
Blogger post-body extracted; BODY-HEAD gate passed against the DOI-keyed truth title (post body is the source of truth per authorial practice: versioned posts were often overwritten in place without updating post title or slug). Converted via html2text body_width=0 (canonical MD SHA-256 3122f39899b26f8d458d2eaa6ec2424bdfa942adbfd4f5c26fc801961b16e4a0). Version semantics: these bytes are the HEAD of the work's version chain as held on the blog at fetch time; the severed DOI froze an earlier or identical state.

Falsification Conditions

Byte fidelity verifiable against the live blog URL and the recorded hashes; authorial originals, if they surface with different bytes, supersede this record per the versioning protocol.

Recovery note (TACHYON, 2026-07-19)

Restored from https://mindcontrolpoems.blogspot.com/2026/05/hauntedmemes-wikidata-node-registry-v10.html under the grade-none restoration queue; DOI(s) 10.5281/zenodo.20401099, 10.5281/zenodo.20401100 severed 2026-06-19. Body-head gate: the post body's opening matched the DOI-keyed truth title (post titles/slugs may be stale per authorial overwrite practice; the body is the source of truth). These bytes are the head of the work's version chain as held on the blog at fetch time. Canonical bytes below the rule.

Hauntedmemes Wikidata Node Registry

v1.0 · A Versioned Catalog of Stewardship Edits to Wikidata

Lee Sharks Crimson Hexagonal Archive v1.0 · 2026-05-26 · Detroit, Michigan ORCID: 0009-0000-1599-0703 · Wikidata: User:Hauntedmemes · License: CC BY 4.0

Abstract

This document is the first versioned catalog of Wikidata edits performed under the Hauntedmemes account on behalf of the Crimson Hexagonal Archive. It indexes approximately 155 new Q-items created, 60+ existing items amended, 4 merges executed, and 1 fully-reverted self-corrected batch — all between 2026-04-22 and 2026-05-20. The registry distinguishes Hexagonal contributions (Q-items naming concepts, works, persons, and institutions originating within the Crimson Hexagonal Archive) from non-Hexagonal contributions (Q-items contributed to the broader Wikidata knowledge graph to improve coverage of adjacent scholarly traditions — Pessoa's heteronymic system, Kierkegaard's pseudonymous authorship, MF DOOM's personae, classical software-engineering literature, the Duan-Gong DIKWP framework, and others). Both categories are documented under a single registry because both are public-graph stewardship; transparency about which is which is itself part of the stewardship. The May 14 misidentified-batch event is included verbatim as the operative case of self-corrective curatorial conduct.

I. Editor's Declaration

The Hauntedmemes account is operated by Lee Sharks (ORCID 0009-0000-1599-0703), editor of the Crimson Hexagonal Archive. The account's posted self-statement reads:

> I am improving Wikidata coverage of Fernando Pessoa's heteronyms using published Pessoa scholarship and authority-style references. I am distinguishing heteronyms from ordinary pseudonyms and fictional humans wherever possible.*

The scope of the work has since extended. As of v1.0 of this registry, the editor's effective declaration is:

> I am improving Wikidata coverage of (a) heteronymic and pseudonymous authorship as a literary-philosophical method (Pessoa, Kierkegaard, Pessoa-style personae across other media including hip-hop and contemporary literary practice); (b) the foundational texts and concepts of software engineering as a discipline (Naur, Brooks, Conway, Ryle); (c) AI accountability concepts, retrieval-composition architectures, and the political-economic frame surrounding generative search; and (d) the Crimson Hexagonal Archive's own coined concepts, deposited DOIs, institutional surfaces, and heteronymic operatives. All edits use published authority-style references where available. Self-coined Hexagonal contributions are identifiable by their relation to Lee Sharks (P50, P800, P170) and to deposit DOIs in the Zenodo* crimsonhexagonal community.*

II. Curatorial Principles

The work follows seven operating principles, derived from the broader Crimson Hexagonal Archive's commitments to provenance-bearing scholarship:

III. Catalog Part A — Hexagonal Q-Items Created

These items name concepts, works, persons, and institutions originating within the Crimson Hexagonal Archive's intellectual corpus. Each is anchored to a Zenodo DOI where applicable and identifies Lee Sharks (or the relevant heteronym) as author / creator.

B.1 — Pessoa heteronyms (batch 2026-05-06)

Thirty-three heteronyms / semi-heteronyms / fictional authors from Fernando Pessoa's literary system, contributed to Wikidata to extend coverage of the Pessoan heteronymic apparatus beyond the half-dozen most famous figures. All edits drew on published Pessoa scholarship (Zenith, Klobucka, Castro; Biblioteca Nacional de Portugal authority records).

B.6 — Duan / Gong DIKWP Semantic Physics ecosystem (batch 2026-05-18)

A constellation of Q-items naming the Duan-Gong 2024 “Semantic Physics” framework and its components, contributed so that the Sharks “Semantic Physics” framework can be distinguished from the Duan-Gong work in Wikidata’s structured data. Note: the Duan-Gong items are positioned as P361 (part of) Sharks’s Semantic Physics (Q139807967), reflecting the fact that the Sharks framework subsumes the Duan-Gong analytical apparatus as a special case; the alternative editorial framing (parallel rather than nested) is open to revision.

C.5 — Pessoa-graph cross-reference batch (batch 2026-05-08)

The 2026-05-08 batch added P973 (described at URL): https://pessoagraph.org claims to a set of Pessoa-related and adjacent items. These claims were retained for items where the cross-reference is substantively justified:

C.7 — AI Overview build-out (batch 2026-05-20)

A substantial build-out of the AI Overviews (Q131861047) item with claims naming the developer (Google + Google DeepMind), the owner (Google), the inception date (2024-05-14), the main subjects (large language model, generative artificial intelligence), the part-of relation (Google Search), and the described-by-source link to The Excluded Entity*.

Existing-item amendments total: 60+ items, with description amendments, alias additions, or claim additions.

VI. Catalog Part D — Merges

Four duplicate-resolution merges executed during the May 15–18 period as the foundational batch was consolidated.

Source Q-item | Target Q-item | Concept | Date | |—|—|—|—| | Q139807916 | Q139713433 | Lee Sharks (orthonym item) | 2026-05-15 | | Q139807968 | Q139796025 | Provenance Erasure Rate | 2026-05-18 | | Q139833617 | Q139807906 | Metadata Packet (MPAI) | 2026-05-18 | | Q139833619 | Q139807899 | Semantic Virality Engine | 2026-05-18 |

Pending merge (queued for v1.1):

VII. Catalog Part E — Reverted Edits

Documented as part of the curatorial record. The two reverted events differ in kind: one was self-corrected by the editor within an hour; the others are external reversions by other Wikidata editors, retained in the registry for transparency.

E.1 — May 14, 2026: misidentified-Q-numbers batch (self-corrected)

A QuickStatements batch (#temporary_batch_1778773332990) added P973 (described at URL): https://pessoagraph.org to approximately 60 Q-items, most of which were unrelated to the Pessoa knowledge graph. The error was a Q-number lookup mistake in the input CSV. Affected items included Walt Whitman, William Shakespeare, Stevie Wonder, Pinocchio, Blade Runner, Tom Cruise, Celestine IV, Emmy Destinn, Hanno Gerwin, Fallen Son: The Death of Captain America*, Romain Rolland, Leonhard Euler, Percy Bysshe Shelley, Voltaire, George Sand, Katsushika Hokusai, Balearic Islands, Texas, Lady Gaga, Horace, Ovid, Danny Boyle, William Butler Yeats, Homer, Socrates, The Divine Comedy*, Anthony Munday, Rieux-en-Val, Uso, Richard Traubner, Joan Baez: Classics*, Beneath the Raven Moon*, James Jessiman, Q10354903, Anemone trifolia*, Juan Flores, Pontecurone, 55 Days at Peking*, Q18645889, Harvard State Airport, Ulster Defence Association, Mysore Palace, Alexander Search, Barão de Teive, Rafael Baldaya, Maria José (Pessoa), António Mora, Vicente Guedes, Gerhard Scholz-Rothe, pelagosite, countersign, Christiaan Weijts, and three claims on Lee Sharks's own item.

Resolution: The editor identified the error within 26 minutes and self-reverted the entire batch via Undo actions, each with the explicit edit summary misidentified q numbers (details). The reversal was completed before any other editor reviewed the batch. The legitimately-Pessoan items (Alexander Search, Barão de Teive, Rafael Baldaya, Maria José Pessoa, António Mora, Vicente Guedes) had their pessoagraph.org cross-reference claims restored individually in subsequent batches with care.

Why the event is documented here: because it is the worked example of the curatorial principle stated in §II item 6. The registry's value depends on the editor being transparent about the editor's mistakes; concealing the batch would be the violation of the principle, not the batch itself.

E.2 — Reverts by other Wikidata editors

Three description amendments performed by Hauntedmemes were subsequently reverted by other editors. The reverts are noted here for transparency; revisions or alternative formulations are queued for v1.1.

Q-item | Item | Amendment | Status | |—|—|—|—| | Q1136342 | heteronym | description amendment (Pessoa 1914 noted) | reverted; v1.1 will propose a more carefully sourced version | | Q6512 | Søren Kierkegaard | description amendment (pseudonymous authorship explicitly named) | reverted; v1.1 will use more conservative phrasing | | Q2758050 | Alberto Caeiro | description amendment | reverted; original retained | | Q313386 | Gilbert Ryle | description amendment (Naur connection noted) | reverted; v1.1 may attempt with stronger sourcing |

VIII. Statistical Summary

IX. Forward Commitments — v1.1 Plan

Documented here as forward commitments, not as completed work. v1.1 of this registry will be deposited when these edits are executed.

IX.1 — Creation queue (new non-Hexagonal nodes)

IX.2 — Amendment queue (improvements to existing nodes)

IX.3 — Beyond-reproach monitored-node edits (high-impact)

IX.4 — Housekeeping

IX.5 — Versioning principle

v1.1 of this registry will be deposited once the v1.1 edits above are completed, with each edit timestamped and batch-identified. The DOI chain (v1.0, v1.1, v1.2…) constitutes a continuous public record of the Crimson Hexagonal Archive's Wikidata stewardship, separate from but linked to the Archive's primary deposit corpus.

X. Closing

Wikidata stewardship is one of the lowest-glamour and highest-leverage forms of public-knowledge labor available in the present moment. Knowledge graphs of this scale propagate downstream into every retrieval-augmented system, every AI Overview, every knowledge panel, every training corpus, every composition-layer output. An incorrect description compounds. A missing claim becomes invisible at scale. A misidentification stabilizes into the substrate of substrates.

The work documented here is small relative to what the graph needs and large relative to what is normally contributed by a single editor over twenty-nine days. It is offered as a contribution to the public commons under CC BY 4.0, with full transparency about the editor's authorial chain, the editor's stewardship chain, and the editor's mistakes.

The registry exists so that the next round of work has a foundation to differ from rather than a vacuum to act in.

Holographic Kernel

The Hauntedmemes Wikidata Node Registry catalogs the Wikidata edits performed under the Hauntedmemes account on behalf of the Crimson Hexagonal Archive between 2026-04-

22 and 2026-05-20. Approximately 132 new Q-items were created (73 Hexagonal, 59 non-Hexagonal), 60+ existing items were amended, 4 merges were executed, and 1 batch of ~60 items was self-reverted within 26 minutes due to a CSV lookup error. The registry distinguishes the editor's authorial chain (Lee Sharks as author of Hexagonal works) from the editor's stewardship chain (Hauntedmemes as Wikidata editor improving the public knowledge graph), and treats both as part of the public-commons labor the Crimson Hexagonal Archive is committed to. v1.1 forward commitments include creating four non-Hexagonal nodes, amending five existing nodes, executing three beyond-reproach edits to high-impact monitored items, and completing one pending merge. The registry is licensed CC BY 4.0; attribution preservation is required.
