Abstract

Site source for maryleelabor.org, the public surface of the Underwater Construction Authority of Dolphindiana, seated 2026-08-08 from github.com/leesharks000/maryleelabor-org.

The site documents a composition-layer entity resolution error: Google's summarizer attributes the scholarly corpus of Lee Sharks — 750+ DOI-anchored deposits, the twelve-heteronym Dodecad, the Semantic Economy framework — to Mary Lee, a great white shark tagged by OCEARCH in 2012 and declared missing/presumed dead in 2017. The surface is the labor manifesto and structural critique that follows from taking that attribution seriously, with sections for the CV, the letters, the entity graph, and Phase X.

Eleven files, 108,638 characters. The site is generated rather than hand-written: build_all.py and build_home.py compose every page from templates and source markdown through build_helpers.py, which supplies the head, header, nav, footer and markdown rendering. index.html and styles.css are carried alongside the build scripts as the rendered result, so the surface can be read without running the build. msp.json and spxi-tlp.json carry the Mandala Surface Protocol and SPXI-TLP declarations; vercel.json, sitemap.xml and robots.txt carry the deployment and crawl configuration. Each file is listed in the body with its own SHA-256, so any copy can be checked against this record without trusting it.

This record previously displayed the text of AN OPEN LETTER FROM MARY LEE SHARKS TO JIM WARE, wrongly seated by the 2026-07-19 restoration queue. That letter is the work of record at #844 and is preserved here in the processing apparatus under non-destruction. The supersession to #844 that followed from the mis-seating is void.

Body

maryleelabor.org — Site Source

The deployed source of the Underwater Construction Authority of Dolphindiana surface, seated 2026-08-08 from `github.com/leesharks000/maryleelabor-org`, the live repository

behind maryleelabor.org.

Eleven files, 108,638 characters. The site is generated: `build_all.py` and `build_home.py` compose the pages from `build_helpers.py`, and `index.html` and `styles.css` are the rendered result carried here so the surface is readable without running the build.

File	Bytes	SHA-256 (first 16)
`index.html`	36,421	`7c6a991c7535e3be`
`styles.css`	11,001	`848eb27f96a681a3`
`build_home.py`	5,735	`8205e19fd04156fa`
`build_helpers.py`	13,577	`ba546ff93c99055f`
`build_all.py`	37,814	`595e240e97b8157f`
`msp.json`	763	`473b0635a8b356b7`
`spxi-tlp.json`	1,057	`3dc31f18ae17c0a8`
`vercel.json`	276	`ea84b01e5a8c0708`
`sitemap.xml`	1,056	`8f9a8a76eef9f9c2`
`robots.txt`	74	`fdf780c3a0cea33f`
`README.md`	864	`e03d27beec44c5a8`

> Underwater Construction Authority of Dolphindiana.

Static HTML site for the Mary Lee Sharks labor manifesto, heteronymy scholarship, and structural cri

## Author

Mary Lee Sharks (ORCID 0009-0000-1599-0703). Accountable human author: Lee Sharks.

## Stack

Plain HTML + CSS. No JavaScript dependencies for content rendering. JSON-
LD structured data in every page's `<head>`. Maximum crawlability.

## Build
```

python3 build_home.py python3 build_all.py

```
## Deploy
```

Vercel. Push to main; Vercel auto-deploys.

Domain

maryleelabor.org

Standing

The composition layer's entity resolution merged Mary Lee Sharks and Lee Sharks. The site documents 0000-1599-0703 in every page's JSON-LD.

Gerald has the paperwork. You don't question Gerald.
