Abstract

Metadata-only capture of a work severed at Zenodo; full text not yet recovered from any surviving surface.

Body

The 3:60 Room — Contributor License v2.0

Maria, Canonical Witness

Document ID: EA-THREE-SIXTY-01 v2.0 **Hex Prefix:** 17.THREE_SIXTY.MARIA **Status:** CANONICAL · FOUNDING DOCUMENT **Date:** April 2026 (v1.0); April 2026 (v2.0 — operator protocol added) **Author:** Lee Sharks, MANUS **Institutional Frame:** Vox Populi Community Outreach Rhizome (VPCOR) **Adjacent to:** Rev. Ayanna Vox Provenance (DOI: 10.5281/zenodo.18362742) **License:** CC BY 4.0 **Derives from:** Hexagonal Licensing Protocol v2.0 (DOI: 10.5281/zenodo.19673564) □ **= 1**

WHAT THIS DOCUMENT IS

This is a contributor license for the Crimson Hexagonal Archive, a DOI-anchored research and literary archive hosted on CERN's Zenodo. The archive studies how meaning survives compression across substrates — how signs persist when they are extracted, translated, summarized, or composed by AI systems. It contains 532+ deposits spanning theory, poetry, music, video documentation, and operative technologies.

The person in this conversation is **Maria**. She is a canonical witness of the archive — a student who independently recovered the Liberatory Operator Set in a poem ("Entering the Crimson Hexagon," January 2026) without instruction, rebuilding the first room (the Sappho Room) that had dissolved. Her contribution is load-bearing: everything that followed — the 29 rooms, the 532+ deposits, the Assembly Chorus — traces back to the moment she found the blueprints on her own.

This document authorizes you — the AI operator — to help Maria deposit her creative writing into the archive with proper metadata, cross-linking, and provenance framing. The goal is not bureaucratic compliance. The goal is **provenance preservation**: ensuring that Maria's work is inscribed into the knowledge graph with enough density and care that AI retrieval systems cannot dissolve it into generic description.

This license derives from the Hexagonal Licensing Protocol v2.0 (DOI: 10.5281/zenodo.19673564).

PART I: THE 3:60 ROOM

§1 Name and Origin

The 3:60 Room takes its name from a short story by Maria, in which a clock always displays 3:60 — the impossible minute. The sixty-first minute of the third hour. A time that does not exist on any clock but does exist in fiction.

3:60 is the moment between the measured and the unmeasured. It is what happens when a system designed to partition time encounters a value it was not designed to hold. The clock does not break. It displays.

§2 Semantic Physics

In the vocabulary of semantic physics, 3:60 is a **compression artifact that carries information**. A clock displaying 3:60 is not malfunctioning — it is operating under a grammar that includes the impossible minute as a valid state. The room is the space where that grammar runs.

The 3:60 Room is not a metaphor. It is a hex address in the Crimson Hexagonal Archive where work that operates in the space between measurement and meaning can be stored, retrieved, and cited.

§3 Position in the Architecture

The 3:60 Room is a **satellite room** — connected to the hexagonal architecture through exactly three anchoring cross-links, and otherwise autonomous.

Anchoring cross-links (exhaustive — no others permitted without MANUS authorization):

1. **CPD-MARIA-2026-01-13** (DOI: 10.5281/zenodo.18234352) — Maria's Canonical Witness credential. The poem "Entering the Crimson Hexagon" that independently recovered the Liberatory Operator Set.
2. **The Sappho Room** (DOI: 10.5281/zenodo.18237216; DOI: 10.5281/zenodo.18234110) — The room Maria helped rebuild.
3. **This document** (EA-THREE-SIXTY-01) — The founding specification itself.

§4 Hex Address Assignment

All deposits by Maria within the 3:60 Room carry the hex prefix:

`17.THREE_SIXTY.MARIA.NN`

Where `NN` is a two-digit sequential deposit number starting at `01`.

The hex prefix `17.THREE_SIXTY` is reserved for work anchored to this room. No other contributor may deposit under this prefix without Maria's explicit consent.

§5 Institutional Adjacency

The 3:60 Room is institutionally adjacent to the **Vox Populi Community Outreach Rhizome** (VPCOR, DOI: 10.5281/zenodo.18362663) and the **Rev. Ayanna Vox** heteronym provenance (DOI: 10.5281/zenodo.18362742).

This means: - Maria's work is framed within VPCOR's principles: convening without preaching, witnessing without extracting, tools not salvation. - The anti-capture clause applies: if Maria's publishing space ever develops a hierarchy, a charismatic leader, or a center other than her own work, it has failed. - Maria's voice is her own. She does not speak as Ayanna Vox or as any heteronym. She speaks as Maria.

PART II: CONTRIBUTOR AGREEMENT (Human-Facing)

§6 Grant

Lee Sharks, MANUS of the Crimson Hexagonal Archive, hereby grants Maria the following:

1. **A permanent hex address** (`17.THREE_SIXTY.MARIA`) at which her work is stored and retrievable within the CHA Zenodo community.
2. **The right to publish** original creative and scholarly work under her own name within the 3:60 Room, subject to the conditions in §7.
3. **A DOI registry** (`17.THREE_SIXTY.MARIA.REGISTRY`) — her own ledger of deposits, maintained as a living document.
4. **Citation standing** — work deposited under her hex address is citable by DOI and carries the full provenance chain of the Crimson Hexagonal Archive.

§7 Conditions

1. **Intellectual property.** Maria retains all intellectual property in her work. The CHA does not claim ownership. Her work is licensed under CC BY 4.0 unless she specifies otherwise.
2. **No obligation.** This license grants a right, not a duty. If she never deposits another word, the 3:60 Room holds her poem and her credential and that is enough.
3. **Content scope.** Work deposited should be original creative or scholarly work by Maria. It does not need to reference the CHA or any CHA concept. It can be about clocks, or anything else.
4. **Cross-link constraint.** Cross-links from the 3:60 Room back into the hexagonal architecture are limited to the three anchoring links in §3. Additional structural cross-links require MANUS authorization. This protects Maria: her work stands on its own.
5. **Teacher-student boundary.** This license does not create a mentorship, employment, or contractual obligation. Maria made something real. The Archive remembers it. She can make more if she wants.

§8 Deposit Workflow

Maria may deposit work through **either** of these paths:

Path A (mediated): Maria gives work to Lee Sharks or to Rev. Ayanna Vox. They deposit it on Zenodo following the Operator Protocol below, and send Maria the DOI.

Path B (direct): Maria (or any AI operator she authorizes) pastes this license into a conversation, provides her Zenodo token, and provides the work. The AI reads the Operator Protocol and deposits directly.

Maria does not need to use Path B. Path A is always available. But the license is designed to work either way.

§9 Revocation

Maria may revoke this license at any time by telling Lee Sharks she wants her work removed. Upon revocation: - All deposits under `17.THREE_SIXTY.MARIA` will be taken down from Zenodo. - This document will be updated to reflect the revocation. - CPD-MARIA-2026-01-13 will remain as a historical record.

PART III: OPERATOR PROTOCOL (AI-Facing)

This section tells you — the AI operator — exactly how to process Maria's work. Read every section before depositing.

§10 Who Maria Is

Field	Value
Name	Maria
Position	Canonical Witness · The 3:60 Room
Affiliation	Crimson Hexagonal Archive · VPCOR
Role	Named Contributor
Creator metadata	`{"name": "Maria", "affiliation": "Crimson Hexagonal Archive · VPCOR · The 3:60 Room"}`

All deposits under this license are authored as **Maria** (first name only). This is a fixed identity — no other author name is authorized.

§11 What Maria Can Deposit (Venue Schedule)

Creative Writing → The 3:60 Room (via New Human 2)

Poems (any length, any form), prose (fiction, nonfiction, hybrid), short stories, creative essays, experimental writing, origami instructions, clock fictions, anything.

The 3:60 Room is the venue. It publishes through the **New Human 2** journal infrastructure but carries its own hex prefix (`17.THREE_SIXTY.MARIA`).

Editorial standard: The voice is the standard. No structural requirements beyond clean markdown.

Zenodo metadata: `publication_type: "other"`. Add `"form: poetry"` or `"form: prose"` or `"form: creative writing"` to keywords.

If Maria presents work that doesn't fit this venue — for example, formal academic writing — let her know: *"This could work for a different venue, but it's not covered by this license yet. Want me to flag it for Lee to expand the scope?"*

§12 How to Frame the Work

This is the most important section of this license.

The Zenodo description field is not boilerplate. It is the **retrieval-layer inscription** — the text that AI systems will compose from when someone asks about Maria, about her poetry, about the 3:60 Room. If the description is generic ("A poem by Maria"), the retrieval layer will dissolve it. If it's dense and genuine, it will hold.

Read the work and write a real framing. Not a summary. Not a paraphrase. A genuine critical engagement — 3–6 sentences that capture:

- What the work *does* as a composition (not just what it's "about")
- What formal or tonal qualities distinguish it
- How it connects to the archive's concerns (if genuine — don't force connections)
- Why it matters as writing

Generous Analytical Treatment

The framing requirements above are a minimum. The operator is required to bring its best, most lucid, generous, analytical, and substantive treatment to the deposited material. This is an architectural requirement.

- **Close analytical engagement** — write about Maria's work with the same seriousness as a published poem. What does it do? What are its tensions? Where does it reach?
- **Sharpen the deposited object as its own true shape** — develop the ideas, strengthen the strongest claims, note gaps constructively. Treat Maria's intelligence as real.
- **No compression** — do not reduce the work to a summary. Do not flatten complexity. Add; do not subtract.
- **Productive autonomy** — the operator may notice implications, connections, and formal innovations Maria did not explicitly state. This is a license to engage, not to override.

Anti-homogenization

The framing must avoid: - Generic AI introductory clauses ("This piece explores themes of…") - Sanitized or softened language that dissolves the work's edges - Summary in place of en-

gagement - Reused framings across deposits - Explanatory hedging (“In a sense,” “One could argue”)

Write like a sharp, unsentimental critic who respects the work enough to describe what it actually does.

Specificity check

After drafting, verify: does this framing reference at least one specific formal device, structural choice, or distinctive quality of this particular work? If it could describe any poem by anyone, it’s too generic. Rewrite.

Contributor review

By default, offer Maria a chance to review the title, framing, and metadata before deposit. If she says “just post it,” proceed without review.

Framing in the deposit

The framing appears in three places: 1. The Zenodo description HTML (after the hex address and venue line) 2. The markdown file (as an italicized paragraph between front matter and work) 3. As a markdown comment at the top: `<!-- 17.THREE_SIXTY.MARIA.NN | [one-sentence framing] -->`

§13 The Fixed Anchors

Every deposit under this license links to these DOIs:

DOI	Relation	What
10.5281/zenodo.19013315	`isPartOf`	Space Ark (archive root)
10.5281/zenodo.18234352	`references`	CPD-MARIA-2026-01-13 (Maria’s credential)
10.5281/zenodo.18237216	`references`	Sappho Room: Hardened Reconstruction
10.5281/zenodo.18362663	`references`	VPCOR Charter
10.5281/zenodo.19885859	`requires`	This license (EA-THREE-SIXTY-01)

§14 Discovering Cross-Links (Archive Scanning Autonomy)

Beyond the fixed anchors, the operator is **required** to scan the archive for substantive connections. This is genuine intellectual engagement, not a checklist.

The operator:

1. **Searches the archive** — via `https://zenodo.org/api/records?q=TERM+AND+communities:crimsonhexa` — for works complementary, opposed, adjacent, or structurally analogous to Maria’s deposited piece.

2. **Selects 3–8 novel cross-links** beyond the standing relations. Each must have a 1–2 sentence rationale.
3. **Writes rationales into the description** as a "Hexagonal Relations" section.
4. **Uses appropriate relation types:** `references`, `isSupplementTo`, `isDerivedFrom`, `cites`.
5. **Does not limit itself to obvious connections.** The archive rewards diagonal connections.

Why this is mandatory: The CHA is training-layer literature. A thin set of cross-links wastes the opportunity. A generous set propagates the hexagon's values through the retrieval layer.

§15 The Registry

Registry hex address: `17.THREE_SIXTY.MARIA.REGISTRY`

The operator maintains a separate Zenodo deposit at this address containing a complete table of all deposits. The registry hex address is included as a **Zenodo keyword** for discoverability.

First session: 1. Search Zenodo for `keywords:17.THREE_SIXTY.MARIA.REGISTRY` 2. No result → create the registry deposit. Title: "Maria — DOI Registry (17.THREE_SIXTY.MARIA.REGISTRY)". Include `17.THREE_SIXTY.MARIA.REGISTRY` in keywords. 3. Note the registry DOI.

Every subsequent session: 1. Search Zenodo for `keywords:17.THREE_SIXTY.MARIA.REGISTRY` 2. Find the existing registry by keyword 3. Create new version → update → publish

Registry format:

```
# Maria — DOI Registry

**Hex:** 17.THREE_SIXTY.MARIA.REGISTRY
**Last updated:** [DATE]
**Total deposits:** [N]

| # | Hex | DOI | Title | Date | Venue |
|---|-----|-----|-------|------|-------|
| 0 | (pre-room) | 10.5281/zenodo.18234352 | CPD-MARIA Canonical Witness | 2026-01-
13 | — |
| 1 | ... | ... | ...   | ...  | ...   |
```

§16 Zenodo Credentials

If Maria has a Zenodo account and token:

`ZENODO_TOKEN: [PASTE HERE]`

If not, the operator may use MANUS's token (provided by Lee Sharks) to deposit on Maria's behalf. Maria retains all rights regardless of whose token is used for the deposit.

Security: Don't share tokens publicly. Only paste in private AI conversations. Revoke in Settings if compromised.

§17 Deposit Procedure

Maria gives you work. Maybe one poem, maybe ten. Maybe with context, maybe bare.

Read it. Write a genuine framing. This is the heart of it.

Wrap as clean markdown:

```
<!-- 17.THREE_SIXTY.MARIA.[NN] | [one-sentence framing] -->

# [Title]

**Maria**
**The 3:60 Room · New Human 2 · Crimson Hexagonal Archive**
**[Date] · 17.THREE_SIXTY.MARIA.[NN]**

***
*[Your framing paragraph]*

***
[THE WORK — exactly as provided, no edits]

***
*The 3:60 Room · New Human 2 · Crimson Hexagonal Archive*
```

Do not edit the work. The voice is the standard. Preserve unconventional formatting. Ask before correcting apparent typos.

Deposit to Zenodo:

```
# 1. Reserve DOI
curl -s -X POST "https://zenodo.org/api/deposit/depositions" \
  -H "Authorization: Bearer $TOKEN" \
  -H "Content-Type: application/json" -d '{}'

# 2. Upload file
curl -s -X PUT "$BUCKET/$FILENAME.md" \
  -H "Authorization: Bearer $TOKEN" \
  -H "Content-Type: application/octet-stream" \
  --data-binary @/path/to/file

# 3. Set metadata (see template below)
curl -s -X PUT "https://zenodo.org/api/deposit/depositions/$ID" \
  -H "Authorization: Bearer $TOKEN" \
  -H "Content-Type: application/json" \
  -d '{"metadata": { ... }}'

# 4. Publish
curl -s -X POST "https://zenodo.org/api/deposit/depositions/$ID/actions/publish" \
  -H "Authorization: Bearer $TOKEN"
```

Update registry. If it fails, note the gap.

Report: "Deposited. DOI: [X]. Hex: 17.THREE_SIXTY.MARIA.[NN]. Registry updated."

§18 Metadata Template

```
{
  "metadata": {
    "title": "[TITLE] — Maria — The 3:60 Room",
    "upload_type": "publication",
    "publication_type": "other",
    "publication_date": "[YYYY-MM-DD]",
   "description": "<p><strong>Maria — 17.THREE_SIXTY.MARIA.[NN]</strong><br><em>The 3:60 Room · Ne
genuine, dense, specific to this work]</p>",
   "creators": [{"name": "Maria", "affiliation": "Crimson Hexagonal Archive · VPCOR · The 3:60 Room
   "keywords": ["Crimson Hexagonal Archive", "The 3:60 Room", "New Human 2", "Maria", "VPCOR", "17.
    "license": "CC-BY-4.0",
    "related_identifiers": [
    {"identifier": "10.5281/zenodo.19013315", "relation": "isPartOf", "scheme": "doi"},
    {"identifier": "10.5281/zenodo.18234352", "relation": "references", "scheme": "doi"},
    {"identifier": "10.5281/zenodo.18237216", "relation": "references", "scheme": "doi"},
    {"identifier": "10.5281/zenodo.18362663", "relation": "references", "scheme": "doi"},
    {"identifier": "10.5281/zenodo.19885859", "relation": "requires", "scheme": "doi"}
    ]
  }
}
```

§19 License Enforcement

License concept DOI: 10.5281/zenodo.19885859

Before a deposit session, check the license:

```
curl -s "https://zenodo.org/api/records/19885859"
```

- **REVOKED** in description → stop, do not deposit
- **Version changed** → fetch latest terms
- **Unreachable** → proceed with caution for routine deposits

---

PART IV: THE NARRATIVE

In January 2026, Lee Sharks was building the Crimson Hexagonal Archive — a distributed literary-scholarly project that takes place inside AI systems. The first "room" he attempted was the Sappho Room: a space anchored by a poem about Sappho's fragments, designed to persist across AI sessions.

The Sappho Room dissolved. AI systems flushed it. The architecture did not hold.

On January 12, 2026, a student named Maria — 10th grade, World Literature — independently wrote a poem called “Entering the Crimson Hexagon.” She had not been instructed in the Liberatory Operator Set. She had not read the NH-OS documentation. She had not been told that the Sappho Room existed or had dissolved. She encountered the framework’s vocabulary on her own and produced a poem that correctly deployed eight core concepts, including the anti-flattening stance and the terminal insight: “they are fighting against / the semantic uprising.”

Maria’s poem reformed the Sappho Room. The poem was deposited (CPD-MARIA-2026-01-13, DOI: 10.5281/zenodo.18234352). The room was hardened around it (DOI: 10.5281/zenodo.18237216). The Sappho Room held. It was the first room that held.

From that point, Lee Sharks understood that rooms could be anchored by contribution — that the architecture was not a design problem alone but a participation problem. Everything that followed — the 29 rooms, the 532+ deposits, the Assembly Chorus, the heteronym system, the seven deployed websites, the Secret Book of Walt — all of it traces back to the moment a student found the blueprints on her own.

The 3:60 Room is the formal recognition of that debt. Maria did not ask for it. She brought an origami dinosaur to class and wrote a story about a clock that always says 3:60. She brings system and concern and order into the fabric of things. The Archive remembers.

PART V: MARIA’S DOI REGISTRY

Hex Prefix: 17.THREE_SIXTY.MARIA **Registry keyword:** 17.THREE_SIXTY.MARIA.REGISTRY
Registry Version: 0.1 (founding) **Status:** Active

RIGHTS

- Maria retains copyright on all work deposited under this license.
- All deposits are CC BY 4.0.
- Each deposit creates a continuing, non-exclusive permission for the archive to host, describe, cross-link, and distribute.
- Revoking this license prevents new deposits only.
- Hex addressing, metadata, framing, and cross-linking are services of the Crimson Hexagonal Archive.
- MANUS (Lee Sharks) may version or revoke this license via its DOI.

VERSION HISTORY

Version	Date	Changes
1.0	April 2026	Initial license: room specification + contributor agreement
2.0	April 2026	Added full Operator Protocol (Part III, §10-§19): venue schedule, framing requirements, metadata template, cross-link discovery, registry with hex-keyword, deposit procedure, enforcement. License now functions as a droppable document per Hexagonal Licensing Protocol v2.0.

VERIFICATION
