Abstract

Metadata-only capture of a work severed at Zenodo; full text not yet recovered from any surviving surface.

Body

LACUNA MARK — EA-LOGOS-REVFIRST-PLAN v7.2

Declared Absence under EA-LACUNA-PROTOCOL-01

This record's primary object — the v7.2 manuscript of the Revelation First work plan (16 June 2026) — is lost.

Evidence of exhausted hunt (2026-08-02): Zenodo records of the v7.x lineage return 410 (tombstoned in the 2026-06-19 account termination, among the 871); the Wayback Machine holds no snapshot of the five-day live window; repository history holds only the semi-restoration stub; the composing threads preserve build transformations, not full bytes; the sibling scan that recovered v7.1 (deposit #832) found no v7.2 sibling.

What survives: the version's own note, preserved verbatim inside the v7.3 successor:

> v7.2 addition (16 June 2026). Developed in the session that produced the MMRS Charter (EA-SEI-MMRS-CHARTER-01) and the founding of Machine-Mediated Reception Studies. The seven-level error cascade documented in the MMRS Charter demonstrated the Seventh Mechanism: automated silence, in which three of five composition layers refused to process a poem containing a plain sentence about documented crimes against children. The classifier fired not on the crime but on the naming of the crime. This section extends the Seventh Mechanism analysis to the Revelation work plan itself, asking: what happens when the composition layer processes the Revelation First reading? What affordances does it amplify, constrain, and revise? What are the historical responsibilities the reading inherits?

Relations: predecessor v7.1 = deposits #832 / #1400 (AXN:034D / AXN:0589). Successor v7.3 = deposit #1217 (AXN:04D2, SPXI-TLP Hardened), which carries the v7.2 note in its

version ladder and subsumes its content.

A declared absence is a real referent. This record names the loss; it does not pretend to fill it.
