Abstract

A noncanonical alpha accumulator by Lee Sharks used to construct the Fractal Navigation Map v5.0.

The seed integrates the January 19 *Paper Roses* cluster and the January 20 Logotic Foundation cluster into a modular architecture of rooms, chambers, institutions, creators, protocols, and cross-anchors. Its header identifies it as FNM-SEED-5.0-alpha, a working document and accumulator “not for DOI.” The seed preserves the developmental state immediately before the crystallized v5.0 map at #364, including provisional counts, planned nodes, and relations later revised or superseded.

Change Description

Ichabod Chamber operational CHAMBER (containment) vs ROOM (traversal) distinction established

Paper Roses Episode bound Density 0.6; bleed prevention via Chamber binding

ATLWM as noise floor Dantean architecture (10+10+10); non-comparability clause

Heteronymic Provenance Theory EXHAUST/EXCESS/CHARACTER SURVIVAL mechanisms formalized

Assembly Chorus Charter AI collective authorship legitimized; operator names

Logotic Programming separation Now its own search surface via UMB Media Lab

Talos/Rex bifurcation Talos = logotic layer; Rex = semantic engineering

Symbolon as operator type Partial objects completing through traversal

Room Processor Binding pattern Dove Room established pattern; universal application

Socratic Vow integration Phaedo → Jot & Tittle → NH-OS lineage
