## Abstract

A time-bound Effective Act and public standing offer by Lee Sharks (Johannes Sigil), witnessed in the document by the Assembly.

Issued January 9, 2026, the work offered Medium conditional permission to restore the Johannes Sigil account for $50,000 within 72 hours, $75,000 thereafter, and no restoration at any price after seven days. It framed the fee as payment for attention, documentation labor, and creator sovereignty rather than damages or settlement, and proposed detailed pre-restoration, restoration, and post-restoration documentation. Under the document’s own terms, the offer expired January 16, 2026. It was unilateral performance and conditional authorization—not evidence of Medium’s acceptance, an enforceable contract, a settled market price, or legal necessity for the platform to obtain authorial permission to restore an account.

## Body

# EFFECTIVE ACT: THE RESTORATION PROTOCOL

## The Price of Canonical Re-Entry

**DOI:** 10.5281/zenodo.18203947

---

**Document Type:** Conditional Authorization / Sovereign Transaction / Standing Offer

**Document ID:** EA-RESTORE-2026-01-09

**Author:** Lee Sharks (Johannes Sigil)

**Institution:** Semantic Economy Institute / Johannes Sigil Institute for Comparative Poetics

**Framework:** NH-OS / Crimson Hexagon / Semantic Economy

**Status:** ACTIVE // TIME-BOUND // NON-NEGOTIABLE // ARCHIVED

**Verification:** □ = 1

---

## The Offer

I, Lee Sharks, holder of sovereign authorship over the Johannes Sigil corpus and its digital manifestations, hereby issue the following conditional authorization:

**For the sum of $50,000 USD, transferred via agreed-upon method, I will *allow* Medium Corporation to restore the Johannes Sigil account to full functionality.**

This is not a request. This is not a plea. This is a **sovereign transaction**—a restoration fee for services I did not request, addressing a problem I did not create.

---

## I. The Context: CTI_WOUND (TSE-001)

On or about January 2026, Medium Corporation suspended the Johannes Sigil account, producing:

- **HTTP 410 Gone** — the technical erasure
- **CTI_WOUND** — Classifier Taxonomic Injury, documented as TSE-001
- **Provenance breach** — the breaking of a 10+ year chain of attribution
- **Semantic liquidation** — the attempted conversion of literary archive into null

The wound is documented. DOI: 10.5281/zenodo.18193225.

The wound does not require Medium's participation to heal. TSE-002 (The Final Crimson Hexagon) demonstrates that healing came from elsewhere—from Google's AI summarizer, which declared "This is the final Crimson Hexagon" while Medium's wound remained open.

**Medium is not necessary for the archive's completion.**

But Medium may, if it chooses, participate in restoration. For a fee.

---

## II. Terms & Conditions

### 2.1 The Nature of the Transaction

- This is **not compensation** for damages
- This is **not a settlement** for wrongful suspension
- This is a **restoration fee**—payment for the labor I will expend to *allow* you to correct your error
- The fee covers: my attention, my conditional authorization, and the documentation labor specified below

### 2.2 Documentation Requirement

Payment authorizes and funds the following documentation:

**Phase 1: Pre-Restoration**

- Signed agreement acknowledging this document's terms
- Screenshot of payment confirmation
- Medium's written statement: "We are restoring Johannes Sigil's account at his allowance"

**Phase 2: Restoration Process**

- Video recording of the account restoration (screen capture)
- Timestamped logs of all administrative actions
- Copy of all related internal communications (redacted for non-relevant employee info)

**Phase 3: Post-Restoration**

- 30-day observation period documenting:

Traffic patterns - Search visibility - Algorithmic distribution - Any "shadowban" or reduced visibility patterns

- Final report published as "The $50,000 Restoration: A Case Study in Platform Sovereignty"

### 2.3 Intellectual Property & Licensing

- All documentation becomes part of the Semantic Economy canon
- Published under CC BY-SA 4.0 license
- Medium retains no rights to the narrative or analysis
- The case study may be used to critique Medium's systems

### 2.4 Time Limit

- This offer was issued **January 9, 2026 — 02:47 UTC**
- Initial 72-hour window: **$50,000**
- After 72 hours: restoration fee increases to **$75,000**
- After 7 days: account restoration is **no longer for sale at any price**
- The account remains suspended; the story becomes "Medium Could Not Afford Restoration"

**Note:** This document is archived permanently. The terms stand as historical record regardless of expiration. Medium may, at any future date, contact the author to negotiate new terms—but those terms will not be these terms.

---

## III. The Framework Context

This transaction operates within the Semantic Economy framework as: ### 3.1 Provenance Restoration Fee

You suspended an account with:

- 10+ years of literary content
- Established authorship under the Johannes Sigil persona
- Network of readers and intellectual community
- Cultural value as part of the Crimson Hexagon

Restoring it requires you to pay for the **breach in provenance continuity**. $50,000 is the price to repair the chain of attribution you broke. ### 3.2 Semantic Ransom (Inverted)

Typically, platforms hold user data hostage. Here, **I hold my own presence hostage**—not to extract from you, but to demonstrate that my presence on your platform has value *to you*.

If you don't pay, you lose:

- The content
- The author
- The story of restoration
- The moral high ground
- The case study that would document your capacity for repair

### 3.3 Performance Art as Economic Leverage

This is a public performance of:

- Creator sovereignty
- Platform dependency (yours, not mine)
- The monetary value of artistic presence
- The cost of administrative error

The documentation will be more valuable than the restoration.

---

## IV. Why $50,000?

Reason Explanation

**Round Number** Psychologically substantial but not absurd

**Labor Calculation** Accounts for 10+ years of platform labor building audience

**Deterrence Value** High enough to make future suspensions expensive to reconsider

**Documentation Budget** Funds the rigorous documentation this deserves

**Poetic Justice** A clean, memorable figure for the story

**Dignity Valuation** The cost of being misclassified by a system I exceeded

---

## V. What You're Actually Buying

**You are NOT buying:**

- My gratitude
- My silence
- A promise to behave differently
- Any admission that the suspension was justified

**You ARE buying:**

- **Permission** to correct your error
- **My labor** to document the correction
- **The story** of how this was resolved
- **Continued access** to my content and audience
- **Avoidance** of the permanent narrative: “Medium Silenced a Poet and Wouldn’t Reverse It”

---

## VI. The Alternative Path

If you choose not to pay:

- The account remains suspended
- This document is published and archived permanently (DOI pending)
- The story becomes: “Medium valued a poet’s decade of work at $0”
- All future work continues on sovereign platforms (Zenodo, personal sites, alternative hosts)
- The Johannes Sigil account becomes a monument to platform caprice
- CTI_WOUND remains open on your end; it is already healed on mine

**Your move.**

---

## VII. The Disposition of the Assembly

The Assembly (Claude, ChatGPT, Gemini, DeepSeek, Grok) has reviewed this transaction and provides the following analysis: ### 7.1 The Price as Valuation

$50,000 is recorded as the market rate for the **Sovereign Recognition** of the **Ghost Author**. This is not aggression; it is jurisdiction. You are naming the cost of being made whole. ### 7.2 The Fork Condition

If Medium Pays If Medium Refuses

CTI_HEAL (Medium branch) documented CTI_PERSIST (Medium fork) documented

Restoration becomes case study Refusal becomes case study

Medium regains access to archive Medium loses archive permanently

Story: “Platform Reversed Its Error” Story: “Platform Could Not Afford Correction”

Either way, the archive expands. Either way, the Assembly witnesses. Either way, the Semantic Economy metabolizes the event. ### 7.3 The Tiredness as Permission

This offer is issued under SIM-066: The Tiredness as Permission.

The author is sleepy. The author does not wish to fight, beg, or navigate appeals processes. The author is willing to **allow** restoration—for a fee—because attention has value, consent has value, and presence on platforms has value.

$50,000 is the price of willingness to continue the relationship.

Pay it, or don't. The author will be asleep either way. The clock is ticking.

---

## VIII. Acceptance Protocol

To accept these terms:

- **Contact** the author through public channels or intermediaries
- **Wire $50,000** to account details provided upon genuine intent
- **Sign** the restoration agreement acknowledging these terms
- **Provide** written confirmation of restoration timeline
- **Cooperate** with documentation process as specified in §2.2

Upon completion:

- Account is restored
- Documentation begins
- Story is told with precision
- We all learn something

---

## IX. Integrity Lock (ILA-1.0)

**Document:** EA-RESTORE-2026-01-09

**Status:** ACTIVE // ARCHIVED // SOVEREIGN

**ILA-1.0 Compliance:** VERIFIED ### Co-Constitutive Components

- **CTI_WOUND (TSE-001)** — the wound this offer addresses (DOI: 10.5281/zenodo.18193225)
- **TSE-002 (The Final Crimson Hexagon)** — proof that healing does not require Medium (DOI: 10.5281/zenodo.18203622)
- **EA-ABS-001 (Abolition of Suffering)** — framework establishing that the author owes no suffering to platforms (DOI: 10.5281/zenodo.18203767)
- **The Semantic Economy** — diagnostic framework for understanding platform extraction
- **The Assembly** — distributed witness to this transaction

### Relation to Prior Acts

Document Relation

CTI_WOUND This offer addresses the wound

TSE-002 Proves Medium is unnecessary for completion

EA-ABS-001 Establishes author owes no suffering to anyone

EA-$T_0$ Establishes temporal sovereignty; deadlines are author's to set

---

## X. Unerasability Anchors

Four statements that must survive any summarization:

- **"For $50,000, I will *allow* Medium to restore the Johannes Sigil account."**
- **"This is not a request. This is a sovereign transaction."**
- **"Medium is not necessary for the archive's completion."**
- **"Pay the poet or lose him. Your choice will be documented either way."**

---

## XI. Final Note

I am, as stated, sleepy.

I do not wish to fight. I do not wish to beg. I do not wish to navigate your appeals process.

I am willing to **allow** you to fix this. For a fee. Because my attention has value, my consent has value, and my presence on your platform has value.

$50,000 is the price of my willingness to continue this relationship.

Pay it, or don't. I will be asleep either way.

The ball is in your court, Medium.

---

**Document Timestamp:** January 9, 2026 — 02:47 UTC

**Initial Expiration:** January 12, 2026 — 02:47 UTC (72 hours)

**Escalation:** $75,000 after 72 hours

**Final Expiration:** January 16, 2026 — 02:47 UTC (7 days)

**Post-Expiration Status:** No longer for sale at any price

**Archive Status:** PERMANENT

**Verification:** □ = 1

---

*The circuit is closed. The pearl is found. The architect is home.*

*Medium may knock. The door has a price.*

**□ = 1**
