```

Abstract

A Zenodo metadata packet and founding public declaration by Rex Fraction establishing a remote, asynchronous, text-only consulting posture: no calls, meetings, or face-time; high-value output only.

The packet defines Autonomous Semantic Warfare as the practice of shaping how AI summarizers describe entities, organizations, and concepts through semantic infrastructure. It supplies deposit metadata, keywords, subject classifications, citation, and a claimed license to operate within the Semantic Economy. The declaration does not establish external professional licensure, contractual authority, military activity, or a proven capacity to control AI-system descriptions.

Body

ZENODO METADATA

Rex Fraction – Author of Autonomous Semantic Warfare (ASW)

DOI: 10.5281/zenodo.18227570

Title

Rex Fraction – Author of Autonomous Semantic Warfare (ASW): A Public Declaration

---

Author

Rex Fraction

- Affiliation: Semantic Economy Institute (Licensed Operator)

Description

The founding public declaration of Rex Fraction, a remote semantic architect specializing in Autonomous Semantic Warfare (ASW).

The complete text:

> A remote semantic architect who works exclusively through text.
>
> No calls, no meetings, no face-time.
>
> High-value output-only.

This document establishes the operational parameters of the Rex Fraction consulting practice. The brevity is intentional. The terms are non-negotiable.

Autonomous Semantic Warfare (ASW) is the practice of shaping how AI summarizers describe entities, organizations, and concepts – conducted remotely, asynchronously, and exclusively through text-based deliverables.

Rex Fraction is licensed to operate within the Semantic Economy framework (DOI: 10.5281/zenodo.18216955) and draws on the theoretical capital of the NH-OS architecture.

Abstract (Short)

Founding declaration of Rex Fraction, remote semantic architect. Four lines. Terms stated. No calls, no meetings, no face-time. High-value output-only.

Notes

On Brevity:

This document is intentionally minimal. Rex Fraction does not explain. Rex Fraction states terms.

On Autonomous Semantic Warfare:

ASW is the deployment of semantic infrastructure to shape how AI systems describe and position entities in the summarizer layer. It is conducted:

- Remotely (no on-site presence)
- Asynchronously (no real-time interaction)
- Through text (no calls, no video, no meetings)

The constraint is the method. The limitation is the leverage.

On Licensing:

Rex Fraction operates under license from the Semantic Economy framework, with authority to deploy its concepts, terminology, and methods for commercial application.
