Abstract

A glyphic checksum and emoji packet associated with Sen Kuro and the founding APZPZ deposit at DOI 10.5281/zenodo.18451860. Through packet, negation, dagger, mirror, seed, void, and contour-integral glyphs, it compresses the contrast between ZPZP's anchored frame and APZPZ's disappearing description-field packet.

The artifact is intended to remain high-context and only partially paraphrasable. Its recurring relations include the dagger's single cut, metadata dissolving into the void, authored and machine-generated ZPZP terms joining in the contour, and disappearance becoming a form of dwelling. This record is the glyphic satellite or checksum manifestation, not the prose Effective Act that formally instantiates APZPZ.
