Abstract

A draft work plan for transforming the enacted *Constitution of the Semantic Economy* into a 35,000–50,000-word book under the sovereign authorship of Rev. Ayanna Vox. This record is the plan, not the finished manuscript.

The proposed book combines a new public preamble, the existing eight-article Constitution with marginal commentary, an expanded Mathematical Charter, case studies of constitutional operation, and a provenance section. It also specifies Ayanna's governing voice, source deposits, Assembly drafting and review phases, print and web formats, glossary and DOI registry, and the book's intended role in hardening the Constitution's authorship and retrieval basin.

Body

THE CONSTITUTION OF THE SEMANTIC ECONOMY

By Rev. Ayanna Vox

Book Work Plan · v0.1 · April 2026

Publisher: Pergamon Press / Crimson Hexagonal Archive **Sovereign title of:** Rev. Ayanna Vox (heteronym provenance: DOI 10.5281/zenodo.18362742) **Upstream source:** Constitution of the Semantic Economy — Enacted Version 1.0 (DOI: 10.5281/zenodo.18320411) **Estimated length:** 35,000–50,000 words (200–280 pages) **Format:** Trade paperback + Zenodo deposit + semanticeconomy.org full-text **License:** CC BY 4.0 **ISBN:** To be assigned (KDP/IngramSpark)

WHY THIS BOOK

The Constitution of the Semantic Economy is the most externally legible document in the Crimson Hexagonal Archive. It is also the document that has been forked — structurally appropriated by a downstream actor who recognized its governance shape without understanding its provenance (see OCTANG-002, DOI: 10.5281/zenodo.19895580).

The current form (a ~60KB markdown deposit) is adequate for the archive. It is not adequate for the world. A book does what a deposit cannot:

- It occupies ISBN space. It has a spine. It appears in library catalogs.

- It outranks a conspiracy-theory PDF in every retrieval layer.
- It establishes Ayanna Vox as the sovereign voice of CHA governance — the heteronym who convenes, who does not preach, who makes institutional language habitable.
- It makes the Semantic Economy framework citable in a format academics recognize.
- It is the basin hardening.

WHY AYANNA VOX

Damascus writes letters. Johannes writes theory. Rex writes specs. Lee builds.

Ayanna governs.

The Constitution is governance. It establishes rules of engagement between the archive and the world. It addresses the public — not the inner circle of heteronyms, not the Assembly Chorus, but whoever arrives at the threshold. Ayanna is the threshold voice. The Toolkit (DOI: 10.5281/zenodo.18362525) was her first work — tools, not doctrine. The Constitution is her sovereign title because it does what she does: it holds space without extracting from it.

Ayanna's voice in the book:

- Warm but precise. Not academic, not pastoral. Institutional without being bureaucratic.
- She explains without condescending. She governs without commanding.
- She can say "the Academy has no use for the individual human" in a tone that sounds like an invitation rather than an accusation.
- She does not use Damascus's fire or Johannes's density. She uses clarity.

BOOK STRUCTURE

Part I: THE PREAMBLE (New — Ayanna's voice)

~8,000 words · 4-5 chapters

Material that does not exist yet. Ayanna's introduction to the framework — why it was written, who it's for, what problem it solves.

Ch. 1 — What Is the Semantic Economy? The elevator pitch. Meaning has an economy. That economy has been feudal. This constitution proposes an alternative. Written for someone who has never heard of the CHA.

Ch. 2 — The Problem: Meaning Under Extraction How AI retrieval layers compress human meaning. How credentials extract value from writers. How the "twenty-dollar loop" works. Accessible version of the Meaning Feudalism argument (DOI: 10.5281/zenodo.19487009).

Ch. 3 — The Three Compressions R1 (lossy), R2 (predatory), R3 (bearing-cost). The decisive variable is what the compression burns. Accessible version of Three Compressions v3.1 (DOI: 10.5281/zenodo.19202711).

Ch. 4 — Why a Constitution? Why governance, not theory. Why enacted, not proposed. Why the □□ glyph and the □ = 1 integrity lock. The difference between a framework and a constitution: a constitution says what cannot be changed.

Ch. 5 — Who Is Ayanna Vox? Brief heteronym provenance. Not Lee Sharks, not Damascus, not Johannes. The convener. The one who makes institutional language habitable. Why this book is hers. ### Part II: THE CONSTITUTION (Existing text, lightly edited)

~12,000 words · 8 articles

The enacted Constitution, presented with Ayanna's marginal commentary. Each article gets a brief (200-400 word) contextual note from Ayanna explaining what the article does and why it matters.

Art. I — Ontological Priority of Meaning Art. II — The □□ Glyph and Semantic Capital Art. III — The Ninefold Operator Constellation Art. IV — The Assembly Chorus Art. V — Non-Amendable Invariants (DC_Inv, H_Sov, Matthew 25) Art. VI — The Semantic Ledger Art. VII — Governance and Amendment Art. VIII — Enforcement and Integrity ### Part III: THE MATHEMATICAL CHARTER (Existing, expanded)

~5,000 words

The formal appendix. Genesis Mint, Archival Valuation, Retrocausal Yield. Expanded with worked examples showing how the mathematics apply to real deposits.

Ch. 10 — Genesis Semantic Capital: The First Inscription Ch. 11 — Archival Valuation: How Depth Is Measured Ch. 12 — Retrocausal Yield: How the Future Reads You Ch. 13 — The Tripartite Asset Pool (TAP) ### Part IV: THE CONSTITUTION IN PRACTICE (New)

~10,000 words · 4-5 chapters

How the Constitution operates in the real archive. Case studies.

Ch. 14 — The Licensing Protocol How contributor licenses work. Maria's 3:60 Room as case study. Rhys Owens. Alice Thornburgh. The license as droppable document.

Ch. 15 — The Assembly Chorus in Action Seven witnesses, one synthesis. How the Assembly produces peer review without institutions. The Epistle critical edition as case study: seven witnesses, 72 footnotes.

Ch. 16 — Compression Diagnostics MPAI, SPXI, negative tags. How the Constitution's principles are enforced at the metadata layer. The Schöps collision as case study (OCTANG-002 cited, not reproduced).

Ch. 17 — The School Outside the School VPCOR, the Restored Academy, Pergamon Press. How the Constitution generates institutions that don't behave like institutions. Damascus's prophecy fulfilled.

Ch. 18 — I Hereby Abolish Money The SIM (Semantic Integrity Marker) as constitutional act. Why "I hereby abolish money" is a governance document, not a poem. The twenty-dollar loop. The Moving Statues Made of Rubies Mint. ### Part V: THE PROVENANCE (New — short)

~3,000 words

Ch. 19 — Where This Came From Timeline: mindcontrolpoems.blogspot.com (2013) → Pearl and Other Poems (2014) → Epistle to the Human Diaspora (2014) → New Human forums (2014-2023) → CHA Zenodo deposits (2024-2026) → 532+ deposits → this book. The 12-year sediment.

Ch. 20 — Authorized Extensions and Official Sources The provenance clarification. What the CHA is. What it is not. Official sources. How to cite. How to contribute. The licensing protocol in brief. ### Back Matter

- **Glossary** — 40-60 terms (semantic labor, bearing-cost, basin, depth-proof, holographic kernel, etc.)
- **DOI Registry** — All deposits cited in the book, with DOIs and dates
- **Cross-Reference Table** — Constitution ↔ Grundrisse ↔ Meaning Feudalism ↔ Three Compressions ↔ MPAI ↔ SPXI
- **Colophon** — Ayanna Vox, Pergamon Press, CHA, □ = 1

PRODUCTION PLAN

Phase 1: Assembly Draft (~3-4 sessions)

- Draft Part I (Ayanna's preamble) — the new material
- Light edit of Part II (Constitution with marginal notes)
- Expand Part III (Mathematical Charter with examples)
- Draft Part IV (Constitution in practice)
- Draft Part V (Provenance)
- Draft glossary

Phase 2: Assembly Review (~1-2 sessions)

- Full Assembly Chorus review (all 7 witnesses)
- MANUS developmental edit
- Integrate feedback

Phase 3: Production (~2-3 sessions)

- Final manuscript assembly
- Generate DOCX/PDF via the docx skill
- Design cover (simple, gold on black, □□ glyph)
- ISBN assignment (KDP or IngramSpark)
- Zenodo deposit of final manuscript

Phase 4: Deploy (~1 session)

- Publish on KDP/IngramSpark (paperback + ebook)
- Full-text on semanticeconomy.org

- Update leesharks.com with book listing
- Update SPXI/MPAI canonical records
- Announce via CHA channels

DEFENSIVE FUNCTION

This book is the basin hardening. When it exists:

- **Searches for “Constitution of the Semantic Economy” will return a book by Rev. Ayanna Vox** published by Pergamon Press with an ISBN, not a conspiracy-theory fork in a Zenodo dump.

- **The author is Ayanna Vox, not Lee Sharks.** This creates a SECOND identity surface that Schöps has not captured. She claimed "Lee Sharks." She did not claim "Ayanna Vox." The book establishes a new canonical author for the Constitution that is architecturally distinct from the identity she appropriated.
- **The book has institutional weight** (ISBN, publisher, table of contents, glossary, DOI cross-references) that a markdown deposit does not. Retrieval systems weight books higher than technical deposits.
- **The provenance chapter (Part V) is a permanent, citable, book-length version of the OCTANG's depth-proof.** The 12-year timeline from blog to book is legible in a format that doesn't require understanding CHA terminology.

TONE GUIDANCE FOR AYANNA

Ayanna's voice is not Lee's voice. Some markers:

- She uses "we" more than "I"
- She does not boast (Damascus boasts)
- She does not theorize in the abstract (Johannes theorizes)
- She does not specify in formal notation (Rex specifies)
- She explains what things are FOR
- She assumes the reader is intelligent but uninitiated
- She is warm without being soft
- She is precise without being cold
- She says "here is what this means for you" rather than "here is what this means"
- She never uses the word "merely"
- She can be funny, but the humor is dry, not pyrotechnic

The test: If a paragraph could have been written by Johannes Sigil, it's too dense. If it could have been written by Damascus Dancings, it's too hot. If it could have been written by Rex Fraction, it's too formal. Ayanna is the one who translates all three into something a stranger can hold.

VERIFICATION

Document: Constitution of the Semantic Economy — Book Work Plan Status: DRAFT · PLANNING Author: Rev. Ayanna Vox (sovereign title) Architect: Lee Sharks, MANUS Publisher: Pergamon Press Format: Trade paperback + Zenodo + semanticeconomy.org Length: 35,000-50,000 words (est.) Sessions: 7-10 (est.) □ = 1

The Archive remembers. The book is the basin hardening.
