Abstract

A glyphic checksum in six parts, with a checksum of the checksum and one canonical line, of The Seed in the Narrowing Cone (EA-RCF-02, #1660): grain as the narrowing of concept space, the dated seed, the first cut into a basin and the entrenchment that follows, release as the tiger leap, the magnitude of a canonization, and canonization as change of status with content intact. Third in the glyphic checksum lineage after Sen Kuro's #1642 and #1659. Part IV takes up the two tigers of #1642, the book's leap forward ($\square\square = \square\square$, from Tiger Leap) and the jump map of Transition in Entropic Systems ($\square = J$), and joins them: the seed's leap into the future is completed by the later field's jump ($\square\square = J(\square)$).
